Abstract

Why are shareholder empowerment and activism such controversial issues in the United States today? Other common law jurisdictions, including the United Kingdom, have welcomed and encouraged greater shareholder participation and engagement in corporate governance. In the United States, however, this prospect has been met with widespread apprehension and resistance. There is a paradox here. The United States is generally regarded as the birthplace of shareholder activism, yet U.S. shareholders have traditionally possessed far fewer corporate governance rights than shareholders in other common law jurisdictions, where such rights are often guaranteed by mandatory laws. U.S. corporate law has been much more focused on protecting shareholders than enabling shareholders to participate in corporate governance, and thereby protect themselves. This article discusses the trajectory of corporate governance in the United States, with particular attention to the regulatory distinction between shareholder protection versus participation in corporate governance. In doing so, it highlights evolving shareholder governance rights in the United States against the backdrop of the shareholder empowerment and proxy access debates. The article also investigates recent U.S. developments, including the growing use by institutional investors of private ordering as a “self-help” mechanism to gain stronger participatory rights. These developments, including controversial bylaw amendments, have the potential to readjust the balance of power between shareholders and boards of directors in U.S. public corporations. They have also created a dynamic and shifting corporate governance terrain, where boards and shareholders are increasingly engaged in “private ordering combat.” The article also explores the intriguing underlying question of why shareholder empowerment and participation in corporate governance are such fraught issues in the United States, compared to some other common law jurisdictions, such as the United Kingdom. To explain this puzzle, the article looks to legal history and to the fundamentally different organizational origins of US and UK corporate law. Organizational origins matter, and divergence in those origins can lead to fundamental differences in the structure of legal regimes. The article argues that this insight is critical to understanding why shareholder empowerment and participation in corporate governance are, and are likely to remain, such contentious issues in the United States compared to other common law jurisdictions.

The Trajectory of American Corporate Governance: Shareholder Empowerment and Private Ordering Combat

(Forthcoming, University of Illinois Law Review, March 2019)

Jennifer G. Hill

Introduction

Why are shareholder empowerment and activism such controversial issues in the United States today? Other common law jurisdictions, including the United Kingdom, have welcomed and encouraged greater shareholder participation and engagement in corporate governance. In the United States, however, this prospect has been met with widespread apprehension and resistance.

There is a paradox here. The United States is generally regarded as the birthplace of shareholder activism, yet U.S. shareholders have traditionally possessed far fewer corporate governance rights than shareholders in other common law jurisdictions, where such rights are often guaranteed by mandatory laws. U.S. corporate law has been much more focused on protecting shareholders than enabling shareholders to participate in corporate governance, and thereby protect themselves.

This article examines the trajectory of corporate governance in the United States, with particular attention to the regulatory distinction between shareholder protection versus participation in corporate governance. The article explores a topic of enormous current interest in the United States, namely the growing use by institutional investors

1 Professor of Corporate Law, The University of Sydney Law School, Australia. Much of the research for this article was conducted while I was a Herbert Smith Freehills Visitor, Cambridge University Law School and Senior Global Research Fellow, Hauser Global Fellows Program, NYU Law School and thanks go to both universities for their support. I would also like to thank a number of people for helpful references and suggestions in relation to this paper. These include Ron Barusch, Margaret Blair, Tim Bowley, Joe Campbell, William Carney, Stephen Choi, Brian Cheffins, Deborah DeMott, Susan Emmeneger, Scott Hirst, Ron Masulis, Geoffrey Miller, Jonathan Nash, William Nelson, David Partlett, Frank Partnoy, Dan Puchniak, Tom Ostrander, Elizabeth Pollman, Julian Redeke, Paul Redmond, Randall Thomas, Bob Thompson, Harwell Wells, Susan Watson, Charles Yablon and participants at a NYU Hauser Fellows seminar, a symposium at the University of Hong Kong Faculty of Law and a workshop at Emory University School of Law. Special thanks go to Alan Ngo, Penina Su and Lily Schafer-Gardiner for excellent research assistance.
of private ordering as a “self-help” mechanism to gain stronger participatory rights in corporate governance. U.S. developments in this regard, including controversial bylaw amendments, have the potential to readjust the balance of power between shareholders and boards of directors in U.S. public corporations. They have also created a dynamic and shifting corporate governance terrain, where boards and shareholders are increasingly engaged in “private ordering combat.”

An intriguing underlying question is why the United States is such an outlier within common law jurisdictions when it comes to shareholder participation in corporate governance. The article explores this question through the lens of legal history. It contrasts the distinctively different organizational origins of U.S. and U.K. corporate law, and backlash against those origins (“origins backlash”), which occurred in both jurisdictions from the late 19th century onwards, but was far more dramatic in the United States than in the United Kingdom.

These crucial differences in organizational starting points, combined with origins backlash, significantly affected the trajectories of corporate law in the United States and the United Kingdom. They also had a profound influence on the complex interplay between law and private ordering, and between mandatory and optional rules, in both jurisdictions.

The article concludes that organizational origins matter, and divergence in those origins can lead to fundamental differences in the structure and operation of legal regimes. It argues that this insight is critical to understanding why shareholder empowerment and participation in corporate governance are, and are likely to remain, such contentious issues in the United States compared to other common law jurisdictions.

1. Shareholder Power and Regulation: The Distinction Between Shareholder Protection and Participation in Corporate Governance

Power is deeply implicated in how we view shareholders and their role in the corporations. Various shareholder images have existed across time and jurisdictions.²

² Jennifer G. Hill, Images of the Shareholder – Shareholder Power and Shareholder Powerlessness in RESEARCH HANDBOOK ON SHAREHOLDER POWER 53 (Jennifer G. Hill & Randall S.
Some of these images (such as shareholders as “dispossessed owners” or “beneficiaries under a trust”) are constructed on the assumption that shareholders are powerless and need protection. Others (such as shareholders as “participants in a political entity”, “gatekeepers” or “stewards”) presume that shareholders possess a certain level of power and ability, which can be used as a regulatory technique in its own right.3

Yet, the concept of power generally, and shareholder power in particular, is elusive and by no means easy to define.4 Power can be held individually or collectively; can be used to influence both corporate controllers and lawmakers,5 and is often most effective when invisible.6 Although economic power and legal power are theoretically distinct, they are interrelated, since economic power can be used to lobby and leverage stronger legal rights, and to legitimize certain corporate actors. Shareholder empowerment through strong legal rights is closely connected to investor activism. The two are not, however, coterminous. Shareholder passivity can exist even when shareholders possess strong rights.7

Corporate regulation “occurs in many rooms”,8 encompassing an array of techniques to control conflicts of interest and ensure corporate accountability.9 These techniques lie across a regulatory spectrum that is closely linked to shareholder power. At one end of the spectrum are “regulatory strategies”, which are designed to safeguard...
shareholder interests and control agency problems, through use of prescriptive legal rules, such as fiduciary duties.\textsuperscript{10} Regulatory strategies are protection-focused, and premised on the assumption that shareholders are vulnerable and incapable of safeguarding their own interests. At the other end of this spectrum lie “governance strategies”, which, in contrast, are generally focused on shareholder empowerment. Governance strategies seek to address the inherent power disparity between shareholders and the board of directors,\textsuperscript{11} by granting shareholders specific legal rights, such as “appointment rights” to control the composition of the board of directors and “decision rights” to intervene in certain firm decisions.\textsuperscript{12} Governance strategies promote shareholder participation, as a form of self-protection, and as an accountability mechanism in its own right.

The effectiveness of shareholder empowerment via governance strategies is context-specific and depends on corporate ownership structure. Where ownership is dispersed, shareholder empowerment represents a counterweight to centralized board power, and acts as a constraint on the board’s discretion and autonomy. Its effectiveness in these circumstances will also depend on the sophistication of shareholders. However, in concentrated ownership settings, including state-owned enterprises, ultimate control will rest with the majority shareholder/s.\textsuperscript{13} Here, shareholder empowerment will be irrelevant, or even counterproductive, as an accountability device.\textsuperscript{14} In these circumstances, rather than providing a check and balance on another locus of power, governance strategies of this kind will merely bolster the power status quo.

\end{flushright}
Implications

If investor sophistication is a key factor in assessing the efficacy of shareholder empowerment, then shareholder profile is also important. Over the last century, there has been a major shift in the profile of shareholders of public corporations, which affects the use of regulatory strategies and governance strategies. *The Modern Corporation and Private Property* famously portrayed shareholders as a dispersed and marginalized group, in need of legal protection due to their inability to act collectively.\(^{15}\) By the 1990s, however, the rise of powerful institutional investors challenged that familiar picture of corporate law,\(^{16}\) making shareholder participation and activism in corporate governance a real possibility.\(^{17}\) This activist theme continued the following decade with the emergence of hedge funds, which experimented with new activist techniques and strategies.\(^{18}\)

Today, the dominant shareholders of public companies in many, but by no means all, jurisdictions are financial institutions broadly defined. In the United States, institutional investor shareholding in the top 1,000 American companies has risen from less than 10% in the early 1950s to over 70%.\(^ {19}\) In the United Kingdom, where institutional ownership has long been high, individual investors now hold only around 10% of listed U.K. equities. The remainder is in the hands of financial institutional investors, but significantly, approximately half of these institutions are now non-

U.K.-based. Financial intermediaries are increasingly important in jurisdictions, such as Australia, where the introduction of a mandatory private pension (“superannuation”) system in the early 1990s led to massive growth of financial intermediation.

The dominance of financial institutions in the United States, coined by Professors Gilson and Gordon as “agency capitalism”, has profound regulatory implications. These institutions are fundamentally different from individual investors, in terms of their structure, incentives and behavior. Economically powerful financial institutions can potentially use governance strategies, such as appointment rights and decision rights, to protect their own, and other shareholders’, interests vis-à-vis the board of directors and corporate management. However, one aspect of contemporary agency capitalism is that such financial institutions are “sophisticated but reticent.” They are unlikely to be first movers, but have a deep understanding of underlying economic and financial issues, and can be prompted by other market players into supporting activism. Agency capitalism provides a generally optimistic assessment of the potential role of institutional investors in contemporary corporate governance.

However, an alternative, and fundamentally contradictory, image of shareholders pervades much contemporary U.S. corporate law commentary. This is that shareholders are predatory and/or disloyal to their ultimate beneficiaries, and contribute to destructive short-termism. Another concern is that rational apathy can

20 Davies, supra note 5, at 356. On the changing nature of the U.K. shareholder structure generally, see House of Commons Business, Energy and Industrial Strategy Committee, CORPORATE GOVERNANCE: THIRD REPORT OF SESSION 2016-17, Apr. 5 2017 at §§ 13-16.

21 See Willis Towers Watson, Global Pension Assets Study 2017, 6, 16, 22 (2017); COMMONWEALTH OF AUSTRAL., FINANCIAL SYSTEMS INQUIRY FINAL REPORT, at 89 (2014).

23 Id. See also Brian R. Cheffins, The Team Production Model as a Paradigm, 38 SEATTLE. U. L. REV. 397, 430 (2015).

24 See, e.g., Leo E. Strine, Jr., The Dangers of Denial: The Need for a Clear-Eyed Understanding of the Power and Accountability Structure Established by the Delaware General Corporation Law, 50 WAKE FOREST L. REV. 761, 787-88 (2015); Lawrence E. Mitchell, Protect Industry from Predatory Speculators, FIN. TIMES (London), Jul. 9, 2009. The idea that activist shareholders, such as hedge funds, are myopic and short-termist has exerted an increasingly powerful influence in U.S. corporate law literature. For a discussion of this literature, see Lucian A. Bebchuk et al., The Long-Term Effects of Hedge Fund Activism, 115 COLUM. L. REV. 1085, 1093-96 (2015). For a recent challenge to the widely held view that the ideal shareholder is, therefore, a long-term investor,
lead institutional investors to delegate voting decisions to proxy advisers, which may themselves be ill-informed, biased or conflicted. From the perspective of regulatory diagnosis and prescription, such an image of shareholders provides policy justifications for restricting, rather than expanding, their corporate governance rights. It also potentially suggests a radical shift in corporate law, from a traditional focus of protecting shareholders to a new goal of protecting the corporation from its shareholders, and shareholders from each other.25 This shift is encapsulated in a recommendation by Martin Lipton that any new legislation/regulation should include protection for companies against shareholder pressure.26

These competing narratives as to the role of shareholders in corporate governance have led to important policy and reform questions about shareholder rights, power and activism and are reflected in a range of recent corporate governance developments around the world.

3. Comparative Corporate Governance: Shareholder Participation and Engagement Around the World

La Porta et al’s influential “law matters” hypothesis stressed the differences between common law and civil jurisdictions in terms of shareholder protection,27 while obscuring important differences within the common law world itself.28 The competing narratives have led to important policy and reform questions about shareholder rights, power and activism and are reflected in a range of recent corporate governance developments around the world.

regulatory narratives concerning shareholder participation in corporate governance represent a clear example of such divergence.

The increasing use of private ordering in the United States to expand shareholder participation rights (through, for example, majority voting; the ability to convene shareholder meetings; nomination and removal of directors) has provoked much controversy. Yet, these same rights are available to shareholders in numerous other common law jurisdictions, such as the United Kingdom, Australia, Singapore and Hong Kong, where they are generally secured by mandatory rules. In the United Kingdom and Australia, for example, investors have an absolute statutory right to convene shareholder meetings and to remove directors of public corporations from office at any time without cause. This latter right precludes the operation of U.S.-style staggered boards in the United Kingdom and Australia. Indeed, when News Corporation relocated from Australia to the United States more than a decade ago, it was the absence of such participation rights under Delaware corporate law that caused a revolt by Australian institutional investors. Analogous rights are also available in some civil law jurisdictions, such as Japan, which has not traditionally been regarded as particularly protective of shareholder interests.

In these various jurisdictions, shareholder participation rights are generally viewed in a positive light as fundamental to corporate accountability and are not controversial. Such engagement has a long history there and is regarded as increasingly important from a regulatory policy perspective.

33 Goto, supra note 7.
34 See e.g., Walker Review, A Review of Corporate Governance in UK Banks and Other Financial Industry Entities: Final Recommendations, National Archives UK, Nov. 26, 2009, at § 5.8.
In recent times, shareholder participation in corporate governance has also been bolstered in many jurisdictions by the adoption of non-binding codes. In the United Kingdom, for example, the influential 2003 Higgs Report proposed a range of governance techniques, specifically designed to ensure open communication and engagement between boards, particularly non-executive directors, and institutional investors. These recommendations were subsequently incorporated into the U.K. Combined Code on Corporate Governance (“U.K. Combined Code”), which adopts a principles-based, “comply or explain” regulatory approach.

In spite of its non-binding status, the U.K. Combined Code is a powerful means of disseminating corporate governance norms. Some corporate governance techniques that are controversial in the United States, such as whether to split the role of chairman and CEO, are regarded as de rigueur in other common jurisdictions, even though they are not mandated, but merely recommended under non-binding codes. In 2016, for example, 48% of S&P 500 companies in the United States split the role of chairman and CEO, but only 27% of S&P 500 companies had a chair that qualified as independent. In the United Kingdom, on the other hand, 99% of FTSE 350 companies had a separate chair and CEO, and 93% of these companies had an independent chair, as recommended by the U.K. Corporate Governance Code.

The United Kingdom also adopted a voluntary Shareholder Stewardship Code (“U.K. Stewardship Code”) in 2010, following the global financial crisis, to encourage

---

36 See Derek Higgs, Review of the Role and Effectiveness of Non-Executive Directors, Dep’t Trade & Industry, Jan. 2003, at §§ 7.4-7.5.

39 SpencerStuart, 2016 Spencer Stuart Board Index: A Perspective on U.S. Boards, SPENCER STUART BOARD SERV., 2016, at 23. Although shareholder proposals requesting companies to split the CEO/chairman role or to have an independent chair were common in the 2017 proxy season, these proposals generally received between 25-40% of shareholder votes, but did not pass. See Sullivan & Cromwell LLP, 2017 Proxy Season Review, SULLIVAN & CROMWELL LLP 11 (Jul. 17, 2017), https://www.sullcrom.com/siteFiles/Publications/SC_Publication_2017_Proxy_Season_Review.pdf.

greater shareholder dialogue with management and activism. One of the underlying premises of this code is that institutional shareholders have a non-delegable responsibility to engage with the companies in which they invest. The U.K. Stewardship Code encourages institutional investors to exercise their power in numerous “hands-on ways” – by means of voting, monitoring, and engaging in “purposeful dialogue” with companies about matters such as strategy, performance, risk and corporate governance (including corporate culture and executive pay). High-level engagement of this kind is common in Scandinavian countries, and has been encouraged under recent reforms in the broader European context. It is also an increasingly important theme in Asian corporate governance. Japan adopted its own Stewardship Code, based on the U.K. model, in 2014, and many other Asian jurisdictions have now followed suit. An analogous set of stewardship principles

---

42 Fin. Reporting Council 2012, supra note 41; Jennifer Hughes, FSA Chief Lambasts Uncritical Investors, FIN. TIMES (London) (Mar. 12, 2009), https://www.ft.com/content/9edc7548-0e8d-11de-b099-0000779fd2ac?mhq5j=e6; Kate Burgess, Myners Lashes Out at Landlord Shareholders, FIN. TIMES (London) (Apr. 21, 2009), https://www.ft.com/content/c0217c20-2eaf-11de-b7d3-00144feabad0.

The U.K. Stewardship Code goes well beyond merely encouraging institutional shareholders to engage more with the companies in which they invest. It also provides a framework for more aggressive conduct by investors if the board of directors is unresponsive to their concerns. In these circumstances, the U.K. Stewardship Code envisages escalation of conduct and states that institutional investors should establish guidelines as to “when and how” they will intensify their activism. Principle 4 of the Code, for instance, specifies various forms of activist conduct, such as “intervening jointly with other institutions on particular issues” and requisitioning a shareholder meeting to remove directors from office.\footnote{Fin. Reporting Council 2012, supra note 41, at 8.}

Recent reforms in Australia also address the issue of unresponsive boards in the context of executive pay. In 2011, Australia enacted its so-called “two strikes rule”,\footnote{The two strikes rule was enacted as part of the Corporations Amendment (Improving Accountability on Director and Executive Remuneration) Act 2011 (Austl.). The rule is found in Corporations Act 2001 (Cth), §§ 250U-250W (Austl.).} which greatly strengthened the position of shareholders in exercising their annual “say on pay” voting rights.\footnote{Australia adopted a “say on pay” provision in 2004, with the introduction of Corporations Act 2001 (Cth), § 250R(2) (Austl.).} Under the two strikes rule, any listed Australian corporation that suffers two consecutive “strikes” – namely shareholder “no” votes of 25% or
more on the annual directors’ remuneration report – must then put a “spill resolution” to its shareholders. If successful, the spill resolution requires all board members to submit to re-election by the company’s shareholders within 90 days.

These international regulatory developments are consistent with Gilson and Gordon’s theory of agency capitalism and adopt a positive narrative about the role of shareholders in corporate governance. They assume that institutional investors have a valuable role to play in corporate governance and that this role may, in appropriate circumstance, include activism.

4. The U.S. Shareholder Empowerment Debate

In contrast to these international regulatory trends, many contemporary U.S. developments reveal a fundamentally different narrative concerning shareholders. Nowhere is the tension between competing images of shareholders and their role in corporate governance - including the dichotomy between shareholder protection and participation - more evident than in the shareholder empowerment debate. This debate, which was essentially U.S.-specific, emerged just prior to the global financial crisis, although its roots arguably go back several decades earlier.

The shareholder empowerment debate related to whether U.S. corporate law should make greater use of governance strategies involving appointment and decision rights, to bolster the position of investors vis-à-vis the board of directors. On one side of the debate, Professor Bebchuk advocated enhanced use of governance strategies in several key areas of U.S. corporate law, including director elections and amendment of corporate constitutions. In the director election context, Bebchuk proposed

---

50 Gilson & Gordon, supra note 22.

“proxy access” reforms, which were designed to give U.S. shareholders stronger rights in the director nomination process for contested board elections, via access to the corporation’s own proxy material. Like shareholder empowerment itself, proxy access was not a new debate in U.S. corporate law – it had simmered beneath the surface for at least fifty years. Bebchuk argued that, without proxy access reforms, shareholders’ notional power to replace directors in the United States was, in fact, illusory.

The issue of shareholder proxy access became linked to another contentious topic relating to director elections, that of majority voting. Under Delaware law, majority voting is the default standard that applies for all shareholder decisions except the election of directors, which, in contrast, falls under a plurality voting default rule. Combined with proxy access restrictions, plurality voting can significantly undermine shareholder influence and choice in director elections. Under a plurality voting system, board nominees that run unopposed can be elected, even if they receive far less than majority shareholder approval. Indeed, in an uncontested board election, a single vote can be sufficient to ensure success.

Bebchuk’s pro-empowerment stance relied on both efficiency and accountability policy rationales. It envisaged increased shareholder participation in corporate

DEL. CODE ANN. tit. 8 § 216(2).

Id. § 216(3).

Note, however, that where a shareholder-adopted bylaw amendment specifies that a majority vote is necessary for the election of directors, the bylaw cannot be amended or repealed by the board of directors. See id. § 216.

decision-making as an alternative, and less intrusive, governance mechanism to external intervention by legislators and regulators. The 2006 Paulson Committee suggested that an independent justification for stronger shareholder rights was the fundamental power imbalance between management and shareholders under U.S. corporate law. Another possible justification is the practical insignificance of the duty of care as a regulatory strategy in the United States. This duty, which constitutes a real liability risk to directors in some common law jurisdictions such as Australia, poses virtually no such risk to U.S. directors in the absence of fraud or self-dealing.

The shareholder empowerment reform agenda encountered intense opposition. Anti-empowerment commentators asserted that, far from improving U.S. economic competitiveness, reforms granting shareholders stronger legal powers would potentially destroy it. Commentators, such as Professor Stephen Bainbridge, claimed that shareholder disempowerment was not a defect of U.S. corporate law, but rather its hallmark and a natural corollary of centralized board authority. They argued that shareholder protection was a more effective regulatory mechanism than participatory rights, and that shareholders were already adequately protected by the market; the ability to exit and to diversify their holdings; and by modern governance measures, such as performance-based pay.

---

61 Committee on Capital Markets Regulation, supra note 60, at 103. This approach essentially ignored the pressures of the market for corporate control. See e.g., Henry G. Manne, Mergers and the Market for Corporate Control 73 J. POL. ECON. 110 (1965).

A negative image of shareholders as predators or disloyal agents underpinned many anti-empowerment arguments. Justifications for restricting shareholder participation in corporate governance included, for example: the risk of balkanized, politicized and dysfunctional boards; board blackmail; abuse of power and opportunistic conduct by sectional shareholder interests; impulsive and reckless conduct by majority shareholders; and a dangerous shareholder preference for short-termism. Some commentators were sufficiently alarmed by the specter of stronger shareholder participation rights that they called for adoption of the “precautionary principle”, commonly used in environmental protection arena to assess any reforms that might shift the balance of power in shareholders’ favor.

An alternative strand of the anti-empowerment argument contended that shareholders themselves did not want stronger participatory rights in corporate governance. According to this hypothesis, if shareholder empowerment were indeed a valuable corporate governance attribute, it would already have evolved in the United States. Recent U.S. corporate governance developments, however, suggest otherwise. These developments show that, not only are institutional investors deeply interested in gaining stronger participation rights in corporate governance, but that, contrary to the claims of some anti-empowerment scholars, they are also prepared to use those

67 See generally Hill, supra note 52.

69 Lipton & Savitt, supra note 64, at 747.

70 Bainbridge, supra note 64, at 1736-37; Strine, supra note 55, 1774; Lipton & Savitt, supra note 64, at 742-44. This argument is closely related to the argument that charter competition between U.S. states tends toward optimal legal systems for regulation of capital markets. See Ralph K. Winter, Jnr., State Law, Shareholder Protection, and the Theory of the Corporation, 6 J. LEGAL STUD. 251, 276-7, 290 (1977). Bainbridge, supra note 64, at 1745, 1751-53; Yair Listokin, If You Give Shareholders Power, Do They Use It? An Empirical Analysis, 166 J. INSTITUTIONAL & THEORETICAL ECON. 38 (2010). However, even some pro-empowerment commentators accept that investment managers, particularly index fund managers, may have limited economic incentives to engage in governance stewardship by exercising their participatory rights. See Bebchuk et. al, supra note 19, at 101.
rights. Furthermore, institutional investors have become increasingly critical of restrictions on their legal rights effected by the adoption of governance structures, such as dual-class voting rights.\textsuperscript{72}

5. U.S. Developments Regarding Shareholder Power

5.1 Post-Crisis Developments re Proxy Access Reform

The global financial crisis reactivated the issue of shareholder empowerment in the United States. The post-crisis goal of restoring investor trust provided new policy rationales for stronger shareholder rights and increased pressure for legislative change.\textsuperscript{73}

In this novel setting, proxy access re-emerged as emblematic of the broader shareholder empowerment debate in the United States.\textsuperscript{74} In 2009, the U.S. Securities and Exchange Commission (“SEC”), after vacillating on the issue for several years,\textsuperscript{75} finally decided to propose a rule implementing proxy access.\textsuperscript{76} Several other crisis-related reform proposals involving enhanced shareholder power surfaced during this period. These included a 2009 Shareholder Bill of Rights, which, according to its preamble, sought to “provide shareholders with enhanced authority over the nomination, election and compensation of public company executives.”\textsuperscript{77} The

\textsuperscript{72} Dual class voting rights are common in the media and technology sectors. TIMES (London) (Nov. 18, 2014), https://www.ft.com/content/09f209b0-6e91-11e4-a65a-00144feabdc0.

\textsuperscript{74} See David Skeel Jr., The Bylaw Puzzle in Delaware Corporate Law, 72 BUS. LAW. 1, 5-8 (2016-17).

\textsuperscript{77} The Office of Senator Charles E. Schumer, Press Release, Schumer, Cantwell Announce ‘Shareholder Bill of Rights’ to Impose Greater Accountability on Corporate America (May 18, 2009),
Shareholder Bill of Rights put forward numerous governance strategies designed to shift the balance of power within U.S. public corporations in favor of shareholders. These proposals elicited fierce opposition and intense political lobbying by corporations.

A range of corporate governance reforms were introduced under the Dodd-Frank Act of 2010 (“Dodd-Frank Act”), the future of which is uncertain since the 2016 Presidential election. These reforms, although extremely controversial at the time, were, in fact, far more modest than the Shareholder Bill of Rights proposals, which the Act superseded. Some of the most contentious provisions of the Shareholder Bill of Rights, such as those relating to staggered boards and majority voting, disappeared completely during the legislative reform process. Others were included in the Dodd-Frank Act, but in diluted form. Although Bainbridge has argued that the post-crisis legislative process in the United States was “hijacked” by powerful institutional investor coalitions, the weakening of shareholder governance rights during the reform process is more consistent with Professor Coffee’s “regulatory sine curve”

---

hypothesis,\textsuperscript{82} and shows that reform attrition due to political lobbying often begins prior to legislative enactment.

One apparently significant corporate governance provision of the Dodd-Frank Act was section 971.\textsuperscript{83} This section laid the administrative groundwork for a federal right of proxy access, by recognising the SEC’s authority to make rules granting shareholders the right to nominate directors via the company’s own proxy materials.\textsuperscript{84} Like many other provisions of the Act, section 971 was weaker than the Shareholder Bill of Rights proposals in several ways. First, although section 971 merely authorized the SEC to make proxy access rules, the analogous provision in the Shareholder Bill of Rights \textit{required} the regulator to make such rules.\textsuperscript{85} Secondly, whereas section 971 only provided the SEC with general rulemaking authority, the Shareholder Bill of Rights included specific preconditions for proxy access, which were quite generous to shareholders. Section 4 of the Shareholder Bill of Rights, for example, granted proxy access to a shareholder, or group of shareholders, beneficially owning not less than 1\% of voting shares for a continuous period of at least 2 years before the next scheduled annual meeting.

Following the passage of the Dodd-Frank Act, the SEC adopted Rule 14a-11 under the Securities Exchange Act of 1934, granting shareholders proxy access in limited circumstances.\textsuperscript{86} These circumstances were more restrictive than the preconditions in section 4 of the Shareholder Bill of Rights. Rule 14a-11 adopted a 3\%/3 year/25%

\textsuperscript{83} C.f. Marcel Kahan & Edward Rock, \textit{The Insignificance of Proxy Access}, 97 VA. L. REV. 1347 (2011) (describing proxy access as insignificant, on the basis that mutual and pension funds are passive investors, and would therefore be unlikely to make use of the right.)

\textsuperscript{84} Delaware had in fact undertaken a preemptive strike in this regard in 2009, when it introduced a new provision, DEL. CODE ANN. tit. 8 § 112, which expressly permitted Delaware corporations to adopt bylaws granting shareholders proxy access rights. See Lisa M. Fairfax, \textit{Delaware’s New Proxy Access: Much Ado About Nothing?} 11 TRANSACTIONS: THE TENN. J. BUS. L. 87 (2009); Skeel, \textit{supra} note 74, at 7, 17-8. On its face, DEL. CODE ANN. tit. 8, § 112, in combination with DEL. CODE ANN. tit. 8, § 109, appeared to enable shareholders to adopt proxy access bylaws. This was, however, a mere phantom right, because under federal law, only the board of directors had the ability to adopt this type of bylaw. See Lisa M. Fairfax, \textit{Delaware’s New Proxy Access: Much Ado About Nothing?} 11 TRANSACTIONS: THE TENN. J. BUS. L. 87, 101-3 (2009).

\textsuperscript{85} Bainbridge, \textit{supra} note 81, at 15. Shareholder Bill of Rights Act of 2009, S. 1074, 111\textsuperscript{th} Cong. § 4(d)(i).

rule, which granted proxy access to a shareholder, or group of shareholders, holding at least 3% of the company’s shares for the previous 3 years, with nominations restricted to 25% of the board of directors. The inclusion of a 3-year holding period requirement responded directly to ongoing concern about possible investor short-termism.

It has been said that the adoption of Rule 14a-11 caused financial institutions to rejoice, “but only briefly.”⁸⁷ In 2011, soon after its adoption, but before becoming operational, there was a successful challenge to the rule in Business Roundtable v SEC.⁸⁸ In that case, the Court of Appeals for the D.C. Circuit vacated Rule 14a-11 and reproached the SEC for acting arbitrarily and capriciously, by failing to make an adequate assessment of the rule’s economic effects prior to its adoption.

Nonetheless, many global institutional investors, including CalPERS, regarded proxy access as “unfinished business”⁸⁹ and, in the aftermath of the Business Roundtable case, lobbied the SEC to revive its proxy access rulemaking efforts. These lobbying attempts were, however, unsuccessful, and highlighted the difference in wording between the Shareholder Bill of Rights and the Dodd-Frank Act. Section 971 of the Dodd-Frank Act, unlike the Shareholder Bill of Rights, merely authorized, but did not oblige, the SEC to make proxy access rules and the SEC, once bitten, was twice shy.⁹⁰

### 5.2 Recent U.S. Developments - Use of Private Ordering to Acquire Governance Rights

The Business Roundtable case did not ultimately prove to be a corporate governance showstopper. Although the decision obstructed the SEC’s proposed proxy access rule,

---

⁹⁰ Bainbridge, *supra* note 81, at 15.
it left the door open to corporate governance change through private ordering by shareholders. In spite of restrictions on shareholders’ participatory rights under U.S. corporate law, shareholders in public corporations have had considerable success with this strategy.

Private ordering can be used to change the allocation of power between the board of directors and shareholders through either amendment to the corporate charter or the bylaws. The ability of shareholders to alter the charter is extremely limited in the United States. Under Delaware law, only the board of directors can initiate charter amendments. This contrasts sharply with U.K. and Australian company law, which permit shareholders to initiate and effect changes to the corporate constitution without board approval. In spite of the restrictions on charter amendment under U.S. law, the number of governance-related charter amendments in public corporations rose steeply during the last decade, with shareholder pressure an important contributing factor. Nonetheless, the board’s strategic superiority as gatekeeper of charter amendments necessarily affects the contents of such amendments.

Bylaw amendment appears on its face to offer shareholders greater private ordering autonomy. Most U.S. states permit either the board of directors or the shareholders to alter the bylaws independently of each other. Section 109(b) of the Delaware

---

93 See DEL. CODE ANN. tit. 8 § 242(b)(1). See also MODEL BUS. CORP. ACT § 10.03 (2002).

94 See Hill, supra note 52, at 347. For example, Corporations Act 2001 (Cth), § 136(2) (Austl.) permits the shareholders in general meeting to alter or repeal the company’s constitution by means of a special resolution. A special resolution is one that has been “passed by at least 75% of the votes cast by members entitled to vote on the resolution” (Corporations Act 2001 (Cth), § 9 (Austl.)). See also Companies Act, 2006 c. 46 § 21(1) (U.K.).

96 Id.

97 Jill E. Fisch, The New Governance and the Challenge of Litigation Bylaws, 81 BROOK. L. REV. 1637, 1653 (2016); Skeel, supra note 74, at 5, 12. Under Delaware law, although shareholders have a statutory right to alter the bylaws, the board of directors will only have that power if it is explicitly conferred by the charter. See DEL. CODE ANN. tit. 8, § 109(a). Publicly traded Delaware corporations invariably grant directors this power from the time of incorporation. See Ann M. Lipton,
General Corporation Law (DGCL) seems to give shareholders broad latitude to amend the bylaws,\textsuperscript{98} however, this power is limited by a qualification that the bylaws cannot be “inconsistent with law or with the certificate of incorporation.” This creates a Catch-22 situation between sections 109(b) and 141(a) of the DGCL,\textsuperscript{99} which vests management power in the board of directors unless otherwise provided by the statute or the charter,\textsuperscript{100} and renders the bylaws subservient to the charter in terms of power allocation.

Although the Business Roundtable case vacated Rule 14a-11, it left intact an earlier SEC amendment to Rule 14a-8, which made it possible for shareholders to put forward their own proposals to adopt proxy access bylaws.\textsuperscript{101} The introduction of DGCL section 112 in 2009 also explicitly authorized the inclusion of proxy access-style rules, although the default rule was one of no proxy access.\textsuperscript{102} In the wake of the SEC’s failure to issue mandatory federal rules, institutional investors relied on this private ordering ability to acquire proxy access rights on a company-by-company basis.\textsuperscript{103}

\begin{flushleft}

E.g., DEL. CODE ANN. tit. 8 § 109(b) permits the bylaws to contain provisions relating, \textit{inter alia}, to the business of the corporation, the conduct of its affairs, and the rights and powers of its stockholders and directors. \hfill 99

The effect of this Catch-22 situation is that shareholder power to adopt and alter bylaws is narrower than the board’s parallel power. See, e.g., C.A. Inc. v. AFSCME Employees Pension Plan, 935 A.2d 227 (Del. 2008); Gorman v. Salamone, 2015 Del. Ch. LEXIS 202. See generally Hill, supra note 52, at 347; Hill, supra note 28, at 47; Fisch, supra note 97, at 1658-61; Gordon D. Smith et al., Private Ordering with Shareholder Bylaws, 80 FORDHAM L. REV. 125, 140 (2011). Shareholders are also “legally hobbled” by various other factors, when seeking to exercise their notional right to adopt and alter bylaws without board approval. See Lipton, supra note 97, at 607. See generally Jill E. Fisch, Governance by Contract: The Implications for Corporate Bylaws, 106 CALIF. L. REV. (forthcoming 2018). \hfill 101

See Skeel, supra note 74, at 8. \hfill 103

See Bebchuk & Hirst, supra note 54 (criticizing a private ordering approach, against the backdrop of a no-access default rule, compared to a mandatory proxy access solution). See also Michal Barzuza, The Private Ordering Paradox in Corporate Law, HARV. BUS. L. REV. (forthcoming 2018) (critiquing the widely-held view that private ordering promotes efficiency, by allowing firms to tailor corporate governance rules to their particular needs). \hfill
Shareholder proposals relating to general corporate governance issues have been in the spotlight in recent years. During the 2015 proxy season, there were 462 such proposals submitted (a 5.5% increase from 2014) and shareholders voted on 333 of those proposals (a 34% increase from 2014).\(^\text{104}\) In the 2016 proxy season, there was a decline in the overall number of corporate governance shareholder proposals submitted (418 proposals) and voted on by shareholders (266 proposals), yet this was partially explained by increased board responsiveness to shareholder demands.\(^\text{105}\)

Shareholder proposals during this period focused on an array of corporate governance matters, including board diversity, director qualifications, separation of the roles of chair and CEO,\(^\text{106}\) and tenure reforms.\(^\text{107}\) However, the clear stand-out issue was proxy access.\(^\text{108}\)

Shareholder proposals relating to proxy access rose from only 17 in 2014, to over 100 at U.S. public corporations in the 2015 proxy season.\(^\text{109}\) This was largely due to the efforts of New York City Comptroller, Scott Stringer, who filed 75 proposals on behalf of New York pension funds as part of the Boardroom Accountability Project.\(^\text{110}\) The Comptroller’s proposals adopted a standardized 3%/3 year/25% proxy access.

\(^{106}\) See Kumar, supra note 104, at 4-9; Kumar, supra note 105, at 4-7; Fisch, supra note 97, at 1651-2. The Dodd-Frank Wall Street Reform and Consumer Protection Act, Pub. L. No. 111-203, 124 Stat. 1376 (2010) § 972 requires an issuer to disclose why it has, or has not, decided to split the role of chair and CEO. In general, shareholders tend to have had less success in pushing for separation between the chair and CEO than for other types of corporate governance reform, such as majority voting and declassification of staggered boards. Also, a number of U.S. companies, such as The Walt Disney Co. and Bank of America, have at times split the roles of chair and CEO under pressure from shareholders, only to recombine them several years later. See Larcker & Tayan, supra note 38.

\(^{107}\) See Kumar, supra note 104, at 4-9.

\(^{108}\) Kumar, supra note 105, 4-7.

\(^{109}\) See Kumar, supra note 104, at 5-6.

access matrix, in accordance with the SEC’s vacated rule. In 2016, approximately 200 shareholder proxy access proposals were submitted, constituting almost half of the total number of shareholder proposals for that year.

Some boards, including those at Bank of America, Citigroup and General Electric (“GE”) voluntarily adopted, or agreed to support, shareholder proxy access. In February 2015, the GE board, voluntarily (or at least preemptively) adopted 3%/3 year/20% bylaw, without submitting it to shareholder vote. However, GE’s board-adopted bylaw also included an aggregation limit of 20 shareholders.

By late 2015, a total of 80 U.S. corporations had adopted proxy access bylaws. By mid-2016, this figure had risen to over 240, and, by 2017, to a total of 420.

---

112 See KUMAR, supra note 105, at 4.

113 Id. at 5.

Although most of the adopted bylaws followed the broad contours of the SEC’s vacated Rule 14a-11 and the New York City Comptroller’s proposals,\textsuperscript{120} 95% of these bylaws introduced an aggregation limit of 20 shareholders,\textsuperscript{121} similar to the bylaw adopted by GE.\textsuperscript{122}

Aggregation limits pose particular problems for the nomination of board members. The Council of Institutional Investors (“CII”) has explicitly stated that it does not endorse such limits or caps.\textsuperscript{123} In keeping with the implications of agency capitalism,\textsuperscript{124} even though investment companies like Vanguard may vote for proxy access candidates, they are unlikely to nominate them in the first place. Therefore, aggregation limits make it far more difficult for shareholders to reach the proxy access ownership threshold in the first place.\textsuperscript{125}

\textsuperscript{119} See Alliance Advisors, \textit{supra} note 105, at 1-6.

\textsuperscript{120} See Sullivan & Cromwell LLP, \textit{supra} note 117, at 2-3.

\textsuperscript{121} Id.

\textsuperscript{122} See Kimball & Higgins, \textit{supra} note 118 (suggesting that a 3/3/20/20 structure has now become the standard currency for proxy access bylaws). In the lead-up to the 2017 annual meeting season, 77% of the 420 companies with proxy access rights followed this 3/3/20/20 blueprint. See Alliance Advisors, \textit{supra} note 105, at 2. See also Weil, Gotshal & Manges LLP, \textit{Heads Up for the 2017 Proxy Season, GOV. & SEC. ALERT} 2 (Nov. 11 2016), \url{https://www.weil.com/~media/publications/sec-disclosure-corporate-governance/2016/pcag_alert_nov_11_2016.pdf}; Sullivan & Cromwell LLP, \textit{supra} note 39, at 8-10.

\textsuperscript{123} See Council of Institutional Investors (CII), \textit{Proxy Access: Best Practices 2017} (July 2017), at 7, \url{http://www.cii.org/files/publications/misc/Proxy_Access_2017_FINAL.pdf}. This position accords with the 2010 SEC proxy access rule. At the same time, CII has recognized that aggregation limits have now become the market norm. See id; See Kimball & Higgins, \textit{supra} note 118.

\textsuperscript{124} Gilson & Gordon, \textit{supra} note 22.

\textsuperscript{125} James McRitchie has noted, for example, that public pension funds will be the most likely institutions to initiate the nomination process under proxy access. However, the aggregation of the six largest public pension funds in Whole Foods amounts to only 1.2% of stock. See James McRitchie, \textit{Fixing Proxy Access Lite, CORPGOV.NET} (Sept. 24, 2015), \url{http://www.corpgov.net/2015/09/fixing-proxy-access-lite/}. It is not surprising that the 2017 proxy access proposals of several activists, including Mr McRitchie, focused predominantly on aggregation limits, and included proposals to raise the nominating group size to 40 or 50 shareholders. See Alliance Advisors, \textit{supra} note 105, at 2-3.
The stance of proxy advisory firms and institutional investors vis-à-vis proxy access proposals varies, and is still evolving. Although Glass Lewis and institutional investors, such as BlackRock and State Street Global Advisers, have typically adopted a case-by-case approach to these proposals, ISS departed from this policy, by substituting a standard positive position for proposals that replicate the SEC’s vacated Rule 14a-11. In 2016, Vanguard, which initially expressed a preference for a more demanding 5%/3 year threshold, shifted to a lower 3% standard, and in 2017, Fidelity, which previously tended to oppose proxy access proposals, announced that it would in future assess all proposals on a case-by-case basis and generally support those with standard market restrictions.

At the same time that shareholder proxy access proposals have burgeoned, there has been a decline in the number of proposals relating to familiar corporate governance concerns, such as majority voting, the right of shareholders to convene special meetings and declassification of staggered boards. This decline, however, is itself testament to shareholders’ overall success in rewriting corporate governance rules through private ordering. They are no longer flashpoint issues, because these battles have now been largely won.

In recent times, for example, there has been a dramatic shift from plurality to majority voting. Between 2006 and 2014, the percentage of S&P 500 companies with some form of majority voting rose from 16% to 90%, and the percentage of S&P 100 companies with majority voting in the 2016 proxy season was 95%.

127 See Alliance Advisors, supra note 126, at 3; Ross Kerber, Exclusive: Vanguard Offers Fresh Backing for “Proxy Access” Reforms, REUTERS NEWS (Feb. 20, 2016).

have no right to convene a special meeting under Delaware law unless they are so authorized by the charter or bylaws.\footnote{See DEL. CODE ANN. tit. 8, § 211(d).} However, as a result of shareholder bylaw amendment proposals, almost two thirds of S&P 500 companies now grant shareholders this right.\footnote{As at June 30, 2016, 295 companies out of the S&P 500 granted their shareholders the right to call a special meeting. See Yafit Cohn, Simpson, Thacher and Bartlett LLP, Special Meeting Proposals, HARV. L. SCH. FORUM ON CORP. GOV. & FIN. REG. (Sept. 2, 2016), https://corpgov.law.harvard.edu/2016/09/02/special-meeting-proposals-2/; Sullivan & Cromwell LLP, supra note 39, at 12-13.} Also, in the decade prior to 2014, the percentage of S&P 500 companies with declassified, or non-staggered, boards rose from 55\% to 93\%.\footnote{SpencerStuart, 2014 Spencer Stuart Board Index, SPENCER STUART BOARD SERV., 2014, at 7. Between 2012 and 2014, the boards of 98 S&P 500 and Fortune 500 companies were declassified, largely it seems, as a result of work undertaken by the Shareholder Rights Project at Harvard Law School. See Harvard Law School Program on Institutional Investors, Shareholder Rights Project, SHAREHOLDER RIGHTS PROJECT, 2017, http://www.srp.law.harvard.edu/index.shtml. The number of S&P 500 companies with declassified boards remained stable during 2015-2016, standing at 92\%. See SpencerStuart, supra note 39, at 14.} As at 2016, staggered boards were present in only 4\% of S&P 100 companies,\footnote{Bell, supra note 130; Fisch, supra note 97, at 1647.} although they remained popular in the technology sector.\footnote{E.g., approximately 50\% of companies in the Silicon Valley (SV) 150 index have a staggered board. Bell, supra note 130.}

\section*{5.3 The Whole Foods Saga, Private Ordering Combat and Impoverished Consent}

Not all U.S. public corporations, faced with shareholder proxy access proposals, have voluntarily adopted, or agreed to support, them.\footnote{See generally Boardroom Accountability Project, supra note 110.} Predictably, many engaged in pushback by, for example, issuing an opposition statement to the proposal.\footnote{See Kess, supra note 111.} Some corporations went further by attempting to preempt a shareholder vote on the proposal altogether. Events at Whole Foods Market, Inc (“Whole Foods”) during 2014-2015 provide a good case study of contemporary corporate governance dynamics regarding bylaw amendments, and exemplify what might be termed “private ordering combat” between boards and shareholders.
The facts of the Whole Foods saga were as follows. Whole Foods claimed that it could rely on Exchange Act Rule 14a-8(i)(9) to exclude a standard 3%/3 year/20% shareholder proposal submitted by James McRitchie, on the basis that it conflicted with the company’s own proxy access bylaw provision proposal. Yet, the Whole Foods’ bylaw proposal was far less generous to shareholders than McRitchie’s. The company’s proposal introduced a stringent 9%/5 year/10% condition. It also restricted proxy access to a single shareholder and prohibited any shareholder aggregation or coordination to reach the already high 9% stock ownership threshold. Indeed, the Whole Foods proposal provided a classic contemporary example of Professor Eisenberg’s concept of “impoverished consent”, whereby shareholders are forced to vote for a management-proposed rule, in spite of preferring a different rule.

Initially, SEC staff legitimized the Whole Foods’ exclusion of McRitchie’s proposal, by granting the company no-action relief. However, in January 2015, following a request by the CII for reconsideration of that decision, the SEC retreated from the original position taken by its staff. Then-Chair, Mary Jo White, announced that the SEC would conduct a review of the Rule 14a-8(i)(9) exemption in the light of

---

140 Letter from Matt S. McNair, supra note 138.

questions concerning its “proper scope and application.”

In a parallel move, SEC staff announced that they would “express no views on the application of Rule 14a-8(i)(9)” during the 2015 proxy season. This meant that corporations, like Whole Foods, which sought to substitute company proposals for shareholder proxy access proposals now did so at their peril, and without the comfort of a no-action letter from the regulator. This announcement by SEC staff extended well beyond the narrow issue of proxy access. It also potentially obstructed a common mechanism used by corporations to exclude a variety of shareholder proposals, including those relating to special meeting rights; removal of supermajority provisions; and clawback proposals.

In October 2015, SEC staff effectively reversed the original grant of “no action” relief to Whole Foods, with the release of new guidelines relating to shareholder proposals. These guidelines narrowed the scope of legitimate exclusion to shareholder proposals that “directly conflict” with a management proposal, in the sense of being mutually exclusive, such that “a reasonable shareholder could not logically vote in favor of both proposals.” According to the SEC staff guidelines, proposals like those at Whole Foods, which “seek a similar objective”, would not meet the high standard of direct conflict needed to justify exclusion of the shareholder

---

145 Alliance Advisors, supra note 126, at 3-4.

147 DIV. OF CORP. FIN., SEC, supra note 146.
proposal. This virtually destroyed the value of Rule 14a-8(i)(9) as a managerial weapon in private ordering combat.

Ultimately, the Whole Foods board itself adopted a proxy access bylaw, which became effective in mid-2015.148 This bylaw was in the standard 3%/3 year/20% form, but contained various restrictions. These restrictions, which were contrary to CII’s stated best practices for proxy access,149 included, for example, an aggregation limit of 20 shareholders; a requirement that loaned shares must be recalled in order to be counted towards the ownership threshold; and a ban on any compensation arrangement (or “golden leash”)150 between a nominee director and a third party.151 In September 2015, McRitchie announced that he had filed a proposal, to be considered at Whole Foods’ next annual meeting, seeking less onerous proxy access conditions.152 In the lead-up to Whole Foods’ annual meeting in March 2016, his new proposal received support from several large funds, as well as from ISS and Glass Lewis.153

Private ordering combat continues apace in U.S. public corporations, although it is evolving into new forms since the Whole Foods saga. From 2016 on, many companies attempted to exclude shareholder proposals to amend previously adopted proxy access bylaws, by relying on SEC Rule 14a-8(i)(10), which permits exclusion

---

151 Sullivan & Cromwell LLP, supra note 117, at 3.

152 The new proposal permitted an unlimited number of eligible shareholders to aggregate their shares to appoint up to 25% of the board or two directors, whichever is greater. See McRitchie, supra note 125.

of shareholder proposals where the company has already “substantially implemented” a proposal. Between February and March 2016, SEC staff granted approximately 30 companies no-action relief, but signaled that there were limits to this relief, when they refused a request by H&R Block to authorize its intended exclusion of a bylaw amendment proposal by James McRitchie. Mr McRitchie’s proposal sought to amend the H&R Block’s existing bylaws to be more shareholder-friendly in relation to, for example, the number of permitted nominee directors; limits on director re-nomination; shareholder aggregation prohibition and the relevant ownership threshold. His proposal reflected a growing trend from 2016 on towards “fix-it” proposals, involving more fine-tuned assessment by shareholders of restrictive secondary features of proxy bylaws.

In refusing to issue a no-action letter for the benefit of H&R Block, SEC staff stated that they were unable to conclude that the company had met its burden of demonstrating that it was entitled to omit McRitchie’s proposal under Rule 14a-8(i)(10) because there was insufficient evidence to show that H&R Block’s proxy access bylaw “compared favorably” with the shareholder proposal. SEC staff came to a similar conclusion during the 2016 proxy season, in denying no-action relief to several other companies, including Microsoft, Apple, Walgreens and Disney.

---

154 See KUMAR, supra note 105, at 5 (noting that around 40 companies were able to exclude a proposal in 2016 on the basis of “substantial implementation”).

155 See Letter from Matt S. McNair, Senior Special Counsel, SEC, to John A. Granda, Stinson Leonard Street LLP (July 21, 2016), https://www.sec.gov/divisions/corpfin/cf-noaction/14a-8/2016/mcritchiewyong072116-14a8.pdf. Mr McRitchie withdrew a proposal in 2015 to adopt proxy access after H&R Block agreed to adopt proxy access bylaws, but then lodged a proposal to amend those bylaws in 2016. See Hoang, supra note 118.

156 Hoang, supra note 118.

157 See Weil, Gotshal & Manges LLP, supra note 122; Kimball & Higgins, supra note 118. In 2017, almost 50% of proxy access proposals sought, usually unsuccessfully, to amend previously adopted proxy access bylaws by, for example, removing restrictive features, such as aggregation limits. See Sullivan & Cromwell LLP, supra note 39, 8-9.

158 Letter from Matt S. McNair, supra note 155. The SEC has previously stated that “a determination that the company has substantially implemented the proposal depends upon whether [the company’s] particular policies, practices and procedures are compare favorably with the guidelines of the proposal.” Texaco, Inc. SEC No-Action Letter (Mar. 28 1991). See generally Amy L. Goodman et al, A PRACTICAL GUIDE TO SEC PROXY AND COMPENSATION RULES § 12.08 (5th ed, 2016 Supp.) (outlining the purpose and operation of Rule 14a-8(i)(10)).

5.4 Proxy Access and Private Ordering – Some Concluding Comments

Proxy access has become the litmus test for shifts in the corporate governance balance of power within U.S. corporations.

Some of the dire predictions that marked the original shareholder empowerment debate have resurfaced in this new context. For example, consistent with the growing fear of investor short-termism, Chief Justice Strine has stated that recent corporate governance developments leave boards increasingly subject to the “immediate whims of stockholders.”160 The reality of shareholder proxy access has also prompted concern about board dysfunction, including “the risk of creating factions and a poisonous atmosphere.”161

The Business Roundtable has sought to depict the developments relating to private ordering by shareholders as fundamentally inconsistent with centralized board authority. After the SEC’s volte-face in relation to Whole Foods in January 2015, the Business Roundtable wrote to Glass Lewis and ISS, requesting that they refrain from making proxy voting recommendations if companies chose, without SEC staff authorization, to exclude shareholder proposals under Rule 14a-8(i)(9). The Business Roundtable justified its request on the basis that “it would be inappropriate for ISS and Glass Lewis to apply their voting policies in a way that substitutes their own judgment as to the appropriate course of action in place of the Board's judgment.”162

Proxy advisers and institutional investors, such as BlackRock, TIAA-CREF and CalPERS, did not accede to this request, instead announcing that they would oppose

---

160 Strine, supra note 24, at 792. According to Chief Justice Strine, recent corporate governance developments, such as the trend to declassification of boards of directors, have resulted in the rapid erosion of mechanisms that traditionally operated as “checks on direct stockholder democracy.” Id.

162 Letter from John Engler, President, Bus. Roundtable, supra note 144.
the election of any directors, who were responsible for omitting shareholder proxy access resolutions without proper SEC staff authorization.\textsuperscript{163}

Proxy access is merely the tip of the iceberg in relation to current U.S. developments concerning allocation of power in corporate governance and shows that private ordering through bylaw amendment is definitely a two-way street.\textsuperscript{164} As noted, many boards have engaged in private ordering combat, using their own bylaw amendment powers to dilute the efficacy of shareholder proxy access by adding stringent preconditions, such as aggregation limits and prohibitions on golden leashes. The skirmishes at companies such as Whole Foods, H&R Block and Microsoft all raise the issue of “impoverished consent” in this regard. Other governance disputes reveal an additional problem of “fragmented consent.” A 2013 clash at Allergan highlighted this issue. Although Allergan shareholders voted in favor of a charter amendment authorizing the holders of 25% of the company’s shares to convene a special meeting, the Allergan board unilaterally adopted extremely broad bylaws, which interacted with, and effectively subverted, that right.\textsuperscript{165}

Private ordering combat has also been evident in the context of shareholder litigation,\textsuperscript{166} where directors adopted “exclusive forum” bylaw provisions as an antidote to multi-forum shareholder suits.\textsuperscript{167} Following the 2013 Boilermakers

\textsuperscript{164} See generally Fisch, \textit{supra} note 97 (describing private ordering governance innovations by both shareholders and boards as a form of “new governance”).

\textsuperscript{167} Boilermakers Local 154 Ret. Fund v. Chevron Corp., 73 A.3d 934 (Del. Ch. 2013) ("Boilermakers"); John Armour et al., \textit{Is Delaware Losing Its Cases?}, 9 \textbf{J. EMPIRICAL LEGAL STUD.
decision,\textsuperscript{168} which upheld exclusive forum bylaws that are unilaterally adopted by the directors, such provisions proliferated in U.S. public companies,\textsuperscript{169} particularly in the highly litigious context of M&A deals.\textsuperscript{170} Finally, some boards attempted to introduce UK-style “loser pays” rules by means of fee-shifting bylaws, which would have potentially inhibited shareholder litigation. Following the 2014 \textit{ATP Tour} decision,\textsuperscript{171} where the Delaware Supreme Court upheld the \textit{prima facie} validity of fee-shifting bylaws, over 70 U.S. public companies adopted such provisions.\textsuperscript{172} A conception of the bylaws as a contract between the company and its shareholders (even though that contract had been drafted and adopted by the directors) was fundamental to the analysis of the courts in both the \textit{Boilermakers}\textsuperscript{173} and the \textit{ATP Tour}\textsuperscript{174} decisions.\textsuperscript{175}

The board of directors and shareholders have not, however, been the only combatants in recent bylaw disputes. There have also been tussles between Delaware’s courts and its legislature regarding bylaw validity, and these clashes have sometimes resulted in different outcomes.\textsuperscript{176} For example, the Delaware legislature responded to the litigation bylaw developments by explicitly permitting the inclusion of forum-

\textsuperscript{168} \textit{Boilermakers}, 73 A.3d 934 (Del. Ch. 2013).

\textsuperscript{169} For example, by August 2014, within a year of the \textit{Boilermakers} decision, 746 U.S. public companies had adopted exclusive forum bylaws. 60% of these were adopted without a shareholder vote. See Fisch, supra note 97, at 1667. See generally Romano & Sanga, supra note 167.

\textsuperscript{171} \textit{ATP Tour, Inc.} v. Deutscher Tennis Bund, 91 A.3d 554 (Del. 2014) (“\textit{ATP Tour Inc.”}).

\textsuperscript{172} Laura D. Richman and Andrew J. Noreuil, Mayer Brown LLP, \textit{DGCL Amendments Authorize Exclusive Forum Provision & Prohibit Fee-Shifting Provisions}, HARV. L. SCH. FORUM ON CORP. GOV. & FIN. REG. (July 6, 2015), https://corpgov.law.harvard.edu/2015/07/06/dgcl-amendments-authorize-exclusive-forum-provisions-and-prohibit-fee-shifting-provisions/. It appears that 30 of these companies were Delaware corporations. See Fisch, supra note 97, at 1674-75.

\textsuperscript{173} \textit{See Boilermakers}, 73 A.3d 934, 955-56 (Del. Ch. 2013).

\textsuperscript{175} \textit{See generally} Skeel, supra note 74, at 9. For criticism of this staunchly contractual approach, and its premise of implied consent by shareholders, see Cox, supra note 166; Deborah A. DeMott, \textit{Forum Selection Bylaws Refracted Through an Agency Lens}, 57 ARIZ. L. REV. 269; Fisch, supra note 100; Lipton, supra note 97.

\textsuperscript{176} Skeel, supra note 74, at 7-11.
selection provisions in the charter or bylaws,177 but prohibiting the inclusion of fee-shifting provisions in either the charter or bylaws.178 These recent interventions of the Delaware legislature, though not unprecedented, are unusual.179

Proxy advisers have themselves recognized the broader corporate governance implications of the proxy access debate and private ordering. ISS has confirmed, for example, that it will recommend its clients oppose directors who adopt charter or bylaw provisions that “materially diminish shareholder rights” without shareholder consent.180 This is no idle threat today, given the changes that have occurred to U.S. share ownership and the corporate governance landscape – changes that have left directors increasingly vulnerable to shareholder discontent.

6. Has There Been a Sea-Change in U.S. Corporate Governance?

Martin Lipton as Bellwether

Until recently, many anti-empowerment proponents adopted arguments presenting both institutional investors and activists in a negative light. In 2013, for example, Martin Lipton, who has been described as “one of the leading warriors against activists,”181 spoke scathingly of institutional investors. He warned that their voting power was being “harnessed by a gaggle of activist hedge funds who troll through SEC filings”, seeking short-term profit at the expense of both the company and the

---

177 The legislature mandated, however, that Delaware must be one of the selected forums. DEL. CODE ANN. tit. 8, §115 (prohibits Delaware corporations from adopting charter or bylaw provisions that exclude Delaware as a forum for internal corporate claims). See Skeel, supra note 74, at 10 (describing this as a “rather remarkable new provision”).

178 DEL. CODE ANN. tit. 8, §§ 102(f) and 109(b). See Fisch, supra note 97, at 1669-71; Richman & Noreuil, supra note 172; Skeel, supra note 74, at 9-11. See also Stephen M. Bainbridge, Fee-Shifting: Delaware’s Self-Inflicted Wound, 40 Del. J. Corp. L. 851 (2016) (describing fee-shifting bylaws as a private ordering solution to the U.S. “litigation crisis”, and arguing that the legislative intervention into this process results in a sub-optimal outcome for Delaware corporations.) Id. at 868, 876-77).

179 See Skeel, supra note 74, at 10, 13-14.

180 ISS, supra note 163, at 5-6. This approach is also consistent with the policy goals of the 2017 ISG Stewardship Principles and ISG Corporate Governance Principles, supra note 46.

economy. This analysis depicted institutional investors as unfaithful servants that collaborate with predatory hedge funds.

Nonetheless, the corporate governance developments discussed above, together with high profile proxy battles, such as the activist campaign of Trian Management Fund ("Trian Fund") against DuPont, had an interesting effect on anti-empowerment rhetoric. Only two weeks before DuPont’s annual shareholder meeting in May 2015 (and, perhaps more significantly, only two days after the announcement that ISS would recommend that shareholders vote in favor of two of Trian Management Fund’s board nominees), Mr Lipton departed from his familiar “take no prisoners” rhetorical style.

Adopting a new, more conciliatory tone, he stated that “Trian Fund Management and its founder, Nelson Peltz, have clearly established credibility and

---

182 Martin Lipton, Wachtell, Lipton, Rosen & Katz., Bite the Apple; Poison the Apple; Paralyze the Company; Wreck the Economy, HARV. L. SCH. FORUM ON CORP. GOV. & FIN. REG. (Feb. 26, 2013), https://corpgov.law.harvard.edu/2013/02/26/bite-the-apple-poison-the-apple-paralyze-the-company-wreck-the-economy/.

183 Steven Davidoff Solomon, DuPont’s Battle With Nelson Peltz May Confound Shareholders, N.Y. TIMES DEALBOOK (May 1, 2015), https://www.nytimes.com/2015/05/02/business/duponts-battle-with-nelson-peltz-may-confound-shareholders.html; Antoine Gara, Trian Concedes Defeat in Proxy War with DuPont’s Ellen Kullman, FORBES (May 13, 2015), http://www.forbes.com/sites/antoinegara/2015/05/13/trian-dupont-ellen-kullman-nelson-peltz/#26a990672a0d. In its long-running activist campaign against DuPont, Trian Management Fund sought to place four nominees, including founder Nelson Peltz, on DuPont’s board of directors, with an eye to breaking up the company. Although, in the lead-up to DuPont’s annual shareholder meeting in May 2015, the outcome was regarded as too close to call, DuPont’s then-CEO, Ellen Kullman, appeared to win a major victory when the company’s shareholders elected all twelve of DuPont’s own nominees. See The DuPont Media Center, DuPont Shareholders Elect All 12 DuPont Nominees at 2015 Annual Meeting. Based on Preliminary Results, DUPONT (May 13, 2015), http://www.dupont.com.au/corporate-functions/media/press-releases/dupont-shareholders-elect-all-12-dupont-nominees-at-2015-annual.html. DuPont’s victory was by a narrow margin (i.e. a majority of 52%). Central to that victory was the fact that indexed investors, such as the Vanguard Group, BlackRock and State Street, which collectively held 16.7% of shares, and CalPERS sided with DuPont’s management. See John C. Coffee, Jr., Lessons of DuPont: Corporate Governance for Dummies, 253 N.Y. L. J. 5 (May 28, 2015). Ultimately, however, Ellen Kullman’s victory at DuPont’s 2015 annual shareholder meeting appeared to be Pyrrhic only, when, in the following quarter, she was removed from office by DuPont’s board of directors. See Jeffrey Sonnenfeld, Another Suicidal Board? How DuPont’s Directors Failed Ellen Kullman, FORTUNE (Oct. 13, 2015), http://fortune.com/2015/10/13/dupont-board-ellen-kullman/. Jeff Mordock, A Wildly Different DuPont a Year After Defeat, DEL. ONLINE (Apr. 29, 2016), http://www.delawareonline.com/story/money/2016/04/29/duponts-wild-ride/83650956/.

acceptability…[t]hey have become respected members of the financial community.” Deviating even further from his customary stance, Mr. Lipton suggested that corporations facing activist campaigns would be “well advised to meet with the activist and discuss the activist’s criticisms and proposals, which are frequently presented in the form of a well-researched whitepaper.” Finally, he commented that “[m]ajor institutional investors like BlackRock and Vanguard want direct contact with the independent directors of corporations.”

Coming from Martin Lipton, observations of this kind - which he has echoed more recently in relation to Trian’s 2017 proxy battle against Procter & Gamble Co. (“P&G”) - bear the hallmark of a sea-change in the balance of power between U.S. boards, activists and institutional investors. They constitute recognition of the implications of agency capitalism, whereby “sophisticated but reticent institutional investors” can, nonetheless, be prompted into supporting activism by other market players.

---

186 Id.

187 See Martin Lipton, Wachtell, Lipton, Rosen & Katz Memorandum, Further Lessons From the P&G/Trian Proxy Fight (Oct. 11, 2017). Mr. Lipton cited equally civil comments by Procter & Gamble’s (“P&G”) CEO, David Taylor, who stated that “[w]e will continue to respectfully engage with Nelson Peltz, whose input we value.” Id. Trian’s proxy battle against P&G was the largest and most expensive in U.S. history. Although Mr. Peltz narrowly lost his bid to gain a board seat at a shareholders’ meeting in early October 2017, he declared that P&G’s victory was at best Pyrrhic, suggesting that he expected DuPont history to repeat itself with respect to P&G. See Sharon Terlep & David Benoit, P&G Says Nelson Peltz Has Lost Bid for Board Seat: He Disagrees, WALL ST. J. (Oct. 10, 2017), https://www.wsj.com/articles/p-g-board-vote-comes-down-to-the-wire-1507629601; David Benoit & Sharon Terlep, P&G Says Nelson Peltz Lost Bid for Board Seat by About 0.2% of Share Count, WALL ST. J. (Oct. 16, 2017). Trian had more success with GE, which recently succumbed to pressure to give Trian a board seat one day before the P&G shareholder vote. See Thomas Gryta et al., GE Gives Activist Trian a Seat on the Board, WALL ST. J. (Oct. 9, 2017), https://www.wsj.com/articles/trian-takes-board-seat-at-general-electric-1507549221.

188 This position is reinforced by the adoption in January 2017 of the ISG Stewardship Principles and ISG Corporate Governance Principles, supra note 46. Interestingly, the signatories to these Principles include, not only of institutional investors, but also some activist hedge funds, such as ValueAct Capital and Trian. Furthermore, institutional investors are not the only ones who can be prompted into supporting activism. As the fall-out from the campaign at DuPont shows, the board of directors of a targeted company can also be persuaded to support activist goals in some circumstances. See Mordock, supra note 183; Lucian A. Bebchuk et al., Dancing with Activists (Nov. 27, 2017), https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2948869 (discussing the rise in settlement agreements between the activist and target boards in recent times).
Comments by the CEO of BlackRock, Larry Fink, also reflect this trend. Although previously critical of some activists for short-termist goals, Mr Fink confirmed in 2016 that BlackRock had supported activists in 39% of the largest proxy contests the previous year. Martin Lipton’s comments, combined with the rise of agency capitalism, suggest that U.S. institutional investors have become the corporate equivalent of swing voters in politics – it seems all sides are now out to woo them in an increasingly globalized investment world. Indeed, Mr Lipton has even presented institutional investors as the best hope for corporate governance peace and “taming the activists.”

---

191 See Fisch, supra note 97, at 1644 (noting the connection between agency capitalism and increased issuer responsiveness to shareholder interests generally). See also Bebchuk et. al., supra note 188, at 4 (arguing that the increase in settlement agreements between activists and target boards is attributable to greater willingness by institutional investors and proxy advisors to support activist campaigns).

192 Lipton, supra note 26. However, in a January 2018 letter to CEOs, Mr Fink suggested that in order to woo investors, such as BlackRock, and tame the activists, companies must adopt “a new model of shareholder engagement”, articulate their strategy for long-term growth, and “benefit all of their stakeholders…and the communities in which they operate”. See BlackRock, Larry Fink’s Annual Letter to CEOs, A Sense of Purpose, Jan. 12, 2018 (https://www.blackrock.com/corporate/en-us/investor-relations/larry-fink-ceo-letter?cid=twitter:larryslettertoceos:blackrock); Peter Horst, BlackRock CEO Talks Companies to Contribute to Society. Here’s Where to Start, FORBES (Jan. 16, 2018), https://www.forbes.com/sites/peterhorst/2018/01/16/blackrock-ceo-talks-companies-to-contribute-to-society-heres-where-to-start/.
7. Divergent Approaches to Shareholder Power and The Role of Legal History

The level of controversy generated in the United States by the shareholder empowerment debate and recent corporate governance developments is puzzling to foreign eyes. Is it even appropriate to regard the current trend towards private ordering by shareholders in U.S. corporations as “activism”? After all, before the decision in Business Roundtable v SEC, private ordering was the preferred regulatory solution of those who opposed mandatory federal proxy access rules. To describe private ordering as “activism” once it becomes a reality suggests that its initial appeal to some opponents of mandatory proxy access may have been the likelihood of failure in practice. Terminology matters, and “activism” tends to have negative connotations in the United States. It is worth considering why private ordering by shareholders is described as “activism”, when private ordering by the board, through, for example, unilateral bylaw amendments, is not.

As previously noted, in many common law jurisdictions outside the United States, shareholder participation rights are viewed favorably, as fundamental to corporate accountability, and are therefore protected by mandatory legislative rules. The kind of engagement with corporate boards that, according to Martin Lipton, major U.S. institutional investors now seek, is not contentious, for example, in the United Kingdom.

It seems that, in an era of globalized investment, U.S. institutional investors are now becoming increasingly aware of the rights held by their counterparts in other jurisdictions, and that this at least partly explains current developments in the United States.

---

193 See e.g., Min, supra note 95, at 26 (arguing that institutional investor voting on shareholder proposals constitutes “shareholder activism in a broader sense”).

194 Business Roundtable v. SEC, 647 F.3d 1144 (D.C. Cir. 2011).

196 See e.g., Walker Review, supra note 34, at § 5.8.

197 Lipton, supra note 26. Further evidence of the pursuit of this kind of engagement by institutional investors is found in the 2017 ISG Stewardship Principles and ISG Corporate Governance Principles, supra note 46.
States, which have seen increasing use by investors of private ordering techniques to acquire shareholder rights that are common in many other jurisdictions. These developments arguably reflect a new form of legal transplantation, whereby the United States has become an importer, rather than an exporter, of corporate governance norms.

Why is the current attitude to changes in the allocation of power and shareholder participation rights so different in the United States to many other jurisdictions, including the United Kingdom? Legal history provides some clues.

7.1 The Organizational Origins of U.S. Corporate Law

In spite of a similar common law heritage, there are major historical differences between U.S. and U.K. corporate law. Each had a fundamentally different organizational starting point, which later prompted different forms of regulatory backlash. These divergent legal trajectories affected the internal allocation of power in companies and the interplay between mandatory and optional rules in corporate regulation in each jurisdiction. They also arguably contributed to what has been described as U.S. corporate law’s “exceptionalism.”

U.S. corporate law originated from early U.K. royal chartered corporations and therefore had quasi-public roots. English chartered corporations included ecclesiastical bodies, guilds, municipal bodies and some trading companies. Famous examples were the East India Company, which was chartered in 1600, and the Bank

---

198 In comparing and contrasting the U.S. and U.K. legal systems, Professor L.C.B. Gower once stated that “if there are sufficient basic similarities to make a comparison possible, there are, equally, sufficient differences to make it fruitful.” L.C.B. Gower, Some Contrasts Between British and American Corporation Law, 69 HARV. L. REV. 1369, 1370 (1956).

of England, which received its initial charter in 1694. Prior to 1844, when the first U.K. general incorporation statute was passed, the only legitimate methods of acquiring corporate personality were by special Act of Parliament or by royal charter.

This need for a charter from the monarch or Parliament reflected the idea that incorporation depended on “the supreme power of the State,” and contributed to the then-prevailing theory that the corporate form was a body, approved by the State to act in “the national interest.” Chartered corporations received delegated government authority and exerted authority through their bylaws. The bylaws could be enforced by various means, such as the imposition of fines and even, in early corporate law history, imprisonment. However, these bylaws were firmly under the control of the state – they were fixed by, and subservient to, the original charter.

---

201 See Samuel Williston, History of the Law of Business Corporations Before 1800: Part I, 2 Harv. L. Rev. 105, 105-6, 111 (1888). In early chartered corporations, members traded with their own stock and at their own risk. Some chartered corporations, such as the East India Company, later moved to a permanent joint stock fund. See C.A. Cooke, Corporation Trust and Company: An Essay in Legal History 49-50 (1951); Samuel Williston, History of the Law of Business Corporations Before 1800: Part I, 2 Harv. L. Rev. 105, 109-10 (1888). It was not until 1693, however, that the East India Company prohibited private trading by members. See Redmond, supra note 200, at § 2.30.

205 Cooke, supra note 201201, at 78.

206 Williston, supra note 201, at 121-22.

207 See Harris & Lamoreaux, supra note 28, at 8.
In the U.S. context, virtually all chartered corporations prior to the American Revolution were “bodies politic”, such as towns, districts, and religious and educational institutions. From the late 1780s on, however, this picture changed. Chartered business corporations grew exponentially, ultimately dwarfing the number of bodies politic.

The majority of early business charter grants effectively involved private ownership of public utilities, such as mills, banks, bridges, toll roads and later, railroads. True to their British roots and to their function in the early U.S. business era, all such corporations, including those for profit, were regarded as “public agencies” required to serve a public purpose. The charters themselves, which were treated as analogous to political constitutions and contracts with the state, often included detailed specification of the grantee’s obligations. The bylaws were the equivalent of “private statutes”, and it was the ability of corporations as “arms of the state” to enforce these private statutes that distinguished them from an unincorporated association. Like their British predecessors, early American colonial corporations

209 Although prior to the American Revolution, there were a mere handful of chartered business corporations, numbers steadily thereafter. See Wells, supra note 4, at 14. Between 1790 and 1829, a total of 4,137 special charters were granted and from 1830-1860, the number of special charters granted rose to 18,282. See ROBERT E. WRIGHT, CORPORATION NATION 62-3 (providing a detailed breakdown of the number of charters granted according to business type from 1790-1860). Early American corporation law did not distinguish between business corporations and bodies politic. See Williston, supra note 201, at 105-6; Joel Seligman, *A Brief History of Delaware’s General Corporation Law of 1899*, 1 DEL. J. CORP. L. 249, 254 (1976).

211 Williston, supra note 201, at 105, 110-11; Maier, supra note 208, at 55-57; Handlin & Handlin, supra note 203, at 22.

212 Maier, supra note 208, at 79-80. See e.g., Trustees of Dartmouth Coll. v. Woodward, 17 U.S. (4 Wheat.) 518 (1819) (holding that a corporate charter was a contract, which could not be unilaterally altered by the state); Charles River Bridge v. Warren Bridge, 36 U.S. 420 (1837) (concerning the nature and scope of sovereign charters in the United States).

213 See Carney, supra note 210, at 83.

214 Seligman, supra note 209, at 254.

215 Id.
were essentially “chips off the block of sovereignty” and, as a result, heavily restricted in their actions.

The transplantation of the U.K. chartered corporation model onto U.S. soil came, however, with some distinctively American twists. First, a critical feature of modern U.S. corporate law emerged during this early period – U.S. states, rather than the federal government, were empowered to charter corporations. Secondly, there was populist backlash in the United States because these charters were originally granted selectively and usually involved monopoly privileges, which was viewed as anti-egalitarian and contrary to the ideals of the American republic.

The problem of the “monopolistic and scandalous” charter system was eventually solved by legislative means. From the early 19th century onwards, U.S. states began

216  Id. at 255 (citing Thomas Hobbes’ phrase from LEVIATHAN).

217  Early American corporations have been described as “puny institutions”, due to their localism and restrictions in their charters regarding permissible business activities. Id. at 254 (citing Eugene Rostow, To Whom and for What End is Corporate Management Responsible? in THE CORPORATION IN MODERN SOCIETY 50 (Edward S. Mason ed., 1959)). See also Leo E. Strine, Jr. & Nicholas Walter, Originalist or Original: The Difficulties of Reconciling Citizens United with Corporate Law History, 91 NOTRE DAME L. REV. 877, 897-99 (2016).

218  Maier, supra note 208, at 52; Strine & Walter, supra note 217, at 894-95. Although U.S. corporate law was state-based and the political matrix varied across different states, parallel general patterns can be discerned in the law’s early development. See Lamoreaux, supra note 199, at 28. State-based corporate legislation was not necessarily a foregone conclusion in the United States. There were several unsuccessful attempts to introduce federal incorporation. See Elizabeth Pollman, Constitutionalizing Corporate Law, 69 VAND. L. REV. 639, 646, 649-50 (2016) (discussing various attempts to introduce federal incorporation, including James Madison’s failed proposal for U.S. federal incorporation in the Constitutional Convention of 1787). See also Robert B. Thompson, Why New Corporate Law Arises: Implications for the 21st Century in THE CORPORATE CONTRACT IN CHANGING TIMES: IS LAW KEEPING UP? (Steven Davidoff Solomon, William Savitt & Randall S. Thomas eds.), (forthcoming, 2017) (discussing three high profile attempts to federalize U.S. corporate law during the 20th century).

219  See generally Maier, supra note 208, at 66-68, 71-72. Thomas Cooper, for example, was damming in his 1830 assessment of special charters as “founded on the right claimed by government, to confer privileges and immunities on one class of citizens, not only not enjoyed by the rest, but at the expense of the rest.” THOMAS COOPER, LECTURES ON THE ELEMENTS OF POLITICAL ECONOMY 246 (2d ed., 1830) (cited in Herbert Hovenkamp, The Classical Corporation in American Legal Thought, 76 GEO. L. J. 1593, 1634 (1988)). See also Eric Hilt, Early American Corporations and the State in CORPORATIONS AND AMERICAN DEMOCRACY 37 (Naomi R. Lamoreaux & William J. Novak eds., 2017).

to make charters freely available under general incorporation statutes. Even after the adoption of these statutes, however, the view persisted throughout the 19th century that corporations owed their existence to the state and involved public purposes. It has been argued that restricted voting practices during this period reflected the fact that many U.S. corporations essentially operated as public-regarding “consumer cooperatives.”

7.2 The Organizational Origins of U.K. Company Law

U.K. company law has fundamentally different organizational origins to U.S. corporate law. By the time of their American ascent, chartered corporations were “all-but-moribund” in Britain. They had been eclipsed by unincorporated joint stock companies (“deed of settlement companies”), and it was these companies that ultimately provided the organizational blueprint for modern U.K. company law.

Deed of settlement companies developed in a parallel universe to chartered corporations. Deed of settlement companies were unchartered associations “on which [225]

---

224 Maier, supra note 208, at 83.

225 Nonetheless, chartered corporations were not completely without influence on the development of U.K. company law. After all, deed of settlement companies were trying to emulate certain aspects of chartered corporations. The legacy of chartered corporations is apparent, for example, in (i) the principle of voting according to the number of shares held, rather than on a “one person, one vote basis”; (ii) the treatment of directors as fiduciaries; and (iii) recognition of the company as a separate legal entity. See REDMOND, supra note 200, at § 2.35; COOKE, supra note 201, at 85.
the sun of royal or legislative favour did not shine.”

They were effectively large partnerships, which, although lacking limited liability, made creative use of the trust concept to replicate certain other features of chartered corporations, such as the ability to hold property and perpetual succession. Deed of settlement companies had strong contractual elements, albeit combined with important fiduciary duty constraints. They did not have a charter or Act of incorporation; rather, their governing rules were found in articles of association in the form of a deed of settlement. All investors (“members”) were required to sign the deed of settlement, which constituted the central feature of the establishment and governance structure of these organizations.

Management of deed of settlement companies was almost invariably vested in trustees or a small managerial group. Nonetheless, the articles of association represented the constitution of these companies, and it was clearly recognized in the 18th century that members could hold the company’s management to account if it deviated from the provisions of the articles of association. The deed of settlement could also provide members with specific supervisory and control powers, although in practice, members of these large unincorporated associations tended to remain passive.

---

226 See Cooke, supra note 201, at 85 (citing Re Agriculturalist Cattle Insurance Company (Baird’s Case) (1870), 5 Ch. App. 725, 734 (per Lord Justice James)). Charters were difficult and expensive to procure, and often denial of legislative favor was due to the ease with which parliamentary chartering Acts could be blocked by interested coalitions. These hurdles to obtaining a charter led to a surge in the formation of unincorporated deed of settlement companies, in spite of the fact that they still represented “an inferior substitute” for chartered corporations. See Timothy W. Guinnane et al., Contractual Freedom and Corporate Governance in Britain in the Late Nineteenth and Early Twentieth Centuries, Feb. 6, 2017, at 6, https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2911402.

227 See Gower, supra note 203, at 535; Cooke, supra note 201, at 85-87. For a recent discussion of the important role that trust law played in the development of U.K. deed of settlement companies, see Morley, supra note 204.

231 John Austin, Joint Stock Companies in Parliamentary History and Review 709, at 711 (1826); Cooke, supra note 201, at 95.

232 See Redmond, supra note 200, at § 2.45 (citing Armand Budington DuBois, The English Business Company After the Bubble Act 1720-1800 217 (1938)).

233 Austin, supra note 231, at 711.
The famous Bubble Act of 1720\textsuperscript{234} epitomized the differences and tensions between chartered corporations and deed of settlement companies in England. The main purpose of the “wordy and obscure” Bubble Act was to outlaw “presuming to act as a corporation” without legal authority.\textsuperscript{235} It was clear that this prohibition was designed to eradicate the growing number of unincorporated deed of settlement companies\textsuperscript{236} from the trading arena, leaving it the exclusive domain of government-approved chartered corporations.\textsuperscript{237}

The Bubble Act failed spectacularly in its attempt to reassert governmental control over British business organizations, and was a classic early example of the gap between “law on the books” and “law in action.” The legislation was largely unenforced\textsuperscript{238} between its enactment in 1720 and repeal in 1825,\textsuperscript{239} and could, in any case, be circumvented by skillful drafting of deeds of settlement.\textsuperscript{240} The result was that unincorporated deed of settlement companies flourished, albeit in a legislative grey zone, during the period when they were ostensibly banned.\textsuperscript{241} This species of company ultimately provided the blueprint for the U.K.’s first general incorporation statute, the 1844 Joint Stock Companies Act.\textsuperscript{242}

\textsuperscript{234} 6 Geo. I, c. 18 (1719). The Bubble Act derives its colloquial name from the South Sea Company Bubble in the early 18\textsuperscript{th} century, a period of “wild speculation and a great catastrophe.” See Cooke, supra note 201, at 80. The Bubble Act was extended to the American colonies from 1741. See 14 Geo. 2, c. 37 (1740); Kenneth K. Luce, Trends in Modern Corporation Legislation, 50 Mich. L. Rev. 1291, 1293, n. 14; Handlin & Handlin, supra note 203, at 5. Nonetheless, the Act appears, however, to have been largely ignored there. Gower, supra note 198, at 1372.

\textsuperscript{235} Gower, supra note 198, at 1370.

\textsuperscript{236} Of the more than 200 companies that were formed around 1720, most were not incorporated by charter. Williston, supra note 201, at 111-12. See also Kathleen F. Brickey, Corporate Criminal Accountability: A Brief History and Observation, 60 Wash. U. L. Q., 393, 398-99 (1982).

\textsuperscript{237} Cooke, supra note 201, at 84; Redmond, supra note 200, at § 2.40. The Bubble Act also targeted chartered corporations operating beyond the purposes of charters or under expired charters. See Margaret Patterson & David Reiffen, The Effect of the Bubble Act on the Market for Joint Stock Shares, 50 J. Econ. Hist. 163, 170-71 (1990).

\textsuperscript{238} There was only one prosecution in the 18\textsuperscript{th} century and a smattering of cases in the early 19\textsuperscript{th} century before Bubble Act’s repeal in 1825. See Cooke, supra note 201, at 84, 97-99, 105; Redmond, supra note 200, at § 2.45.

\textsuperscript{239} Hansard, Joint-Stock Companies – Repeal of the Bubble Act, Hansard, Mar. 29, 1825.

\textsuperscript{240} Cooke, supra note 201, at 99; Redmond, supra note 200, at § 2.45.

\textsuperscript{241} Guinnane et al., supra note 226, at 5; Redmond, supra note 200, at §§ 2.40-2.45.

\textsuperscript{242} 7 & 8 Vict., c. 110. The Act, which was driven by William Gladstone, President of the U.K. Board of Trade from 1843-1845, enabled companies to incorporate by registering their deeds of
The close connection between U.K. company law and partnership law is reflected in legal history, terminology and doctrine. The 1844 Joint Stock Companies Act, which was intended to differentiate between partnerships and companies, actually used the former to define the latter.243 Under this Act, a “joint stock company” was described as a partnership with particular characteristics in terms of size and transferability of shares.244 U.K. partnerships often included the term “& Co”, and a particular company law doctrine, the “just and equitable” shareholder remedy, is a direct transplant from partnership law.245

The divergent origins of U.K. company law (from unincorporated deed of settlement companies) and U.S. corporate law (from chartered corporations) explains many differences in legal terminology between the two jurisdictions. These include use of the terms “companies” and “articles of association” in the United Kingdom, as opposed to “corporations”, “charters”, “incorporated” and “bylaws” in the United States.

By the close of the 19th century, there were striking differences between U.S. and U.K. corporate regulation and governance. These differences reflected the contrasting

---

243 See Gower, supra note 203, at 536.

244 The 1844 Joint Stock Companies Act defined the term “joint stock company” to encompass partnerships with shares that were transferable without the express consent of the co-partners, and also partnerships with more than 25 members. 1844 Joint Stock Companies Act, 7 & 8 Vict., c. 110, § II. This threshold was subsequently reduced to 20 members under the 1856 Joint Stock Companies Act. See 19 & 20 Vict., c. 47, § IV. The 1844 Act constituted the first legislative attempt to differentiate between companies and partnerships, by making certain outsized partnerships unlawful, unless they were either registered under the Act or formed by charter or statute. See Gower, supra note 203, at 536.

245 See Gower, supra note 198, at 1371-72, 1376; Cooke, supra note 221, at 94 (noting the difference between U.S. corporations and English companies). Cf. Ireland, supra note 203, at 239-40 (noting that for much of the 18th and 19th centuries, unincorporated deed of settlement companies and partnerships were regarded as identical from a legal, though not an economic, perspective); Paddy Ireland, Capitalism without the Capitalist: The Joint Stock Company Share and the Emergence of the Modern Doctrine of Separate Corporate Personality, 17 Legal Hist. 41, 42-45 (1996) (discussing the changing meaning of the term “company” over time).
organizational origins of corporate law in the two jurisdictions, and laid the groundwork for future divergence due to backlash against those origins.

Many substantive legal differences between corporate law in the United Kingdom and the United States today can also be traced back to these different organizational origins, and the regulatory backlash they elicited. Whereas the starting point for U.S. corporate law was one of intense state control and regulation, the starting point for U.K. company law was a “free contracting” model of corporate governance, tempered only by strong fiduciary duties.

U.S. and U.K. corporate law developments from the late 19th century onwards involved backlash against these starting points, which resulted in a complex interplay between mandatory and optional rules in each jurisdiction. Although both jurisdictions shifted away from their regulatory starting points, this did not mean that they ended up in the same place.

8.1 The United States

Historically, variation of governance structures of U.S. corporations was, like U.K. chartered corporations, severely limited. A core feature of the American corporation was the need to accumulate capital from many small investors and then place it under “firm central direction.”

Although the anti-egalitarian aspects of the early charter system had been obviated by general incorporation statutes, a Jeffersonian fear of unbridled power of corporations vis-à-vis the government persisted. Early U.S. general incorporation statutes therefore vested managerial power in the board of directors but, at the same time, straightjacketed the board through a myriad of constraints, which mimicked, and often exceeded, the restrictions found in special charters. These statutes, it has been said, fairly “bristled with mandatory rules.” The constraints were designed to ensure that the legislature retained ultimate control.

Even if power could have been allocated differently between participants in early U.S. corporations, the prerequisites for charter alteration would have made this difficult. The 1819 decision in *Trustees of Dartmouth College v Woodward* (“Dartmouth College”) \(^{251}\) interpreted a corporation’s charter as a contract between its original parties, namely “the donors, the trustees, and the crown”, \(^{252}\) which meant that *prima facie* alteration required the consent of all groups. In addition, shareholder approval during this early period entailed unanimous consent. \(^{253}\) The *Dartmouth College* decision shifted the corporation at least partly from the public to the private realm, by protecting corporate charters from unilateral alteration by the state. \(^{254}\) However, Mr. Justice Story’s famous concurring opinion in the case provided a means by which the state could assert such a right – namely if the power to alter the corporation’s charter unilaterally were reserved to the state in the original grant. Reserved state powers of this kind became commonplace in the post-*Dartmouth College* era. \(^{255}\) They provided desirable flexibility to industries undergoing great technological change, by enabling vital charter amendments (such as to enable consolidation of railroads) to be made via state approval alone. \(^{256}\) Nonetheless, it appears that strong shareholder participation rights were embedded in both special charters and in the early American general corporate law statutes. A charter granted in 1791 by New Jersey to the Society for Establishing Useful

\(^{254}\) Seligman, *supra* note 209, at 256; Lamoreaux, *supra* note 199, at 34. Prior to the decision in the *Dartmouth College* case, the corporation could not be said to provide freedom from interference by the state. *See* *Trustees of Dartmouth Coll. v. Woodward*, 17 U.S. (4 Wheat.) 518 (1819); Handlin & Handlin, *supra* note 203, at 17-19.

\(^{255}\) Indeed, such reservations of power occurred even before Mr. Justice Story’s dictum in *Trustees of Dartmouth Coll. v. Woodward*, 17 U.S. (4 Wheat.) 518, 675 (1819). *See Carney, supra* note 210, at 83. These reservations still appear in the MODEL BUS. CORP. ACT § 1.02.

\(^{256}\) Carney, *supra* note 210, at 85.
Manufactures (“the S.U.M.”), which was the state’s first major industrial business corporation and a favorite enterprise of Alexander Hamilton, provides an interesting example of this phenomenon.\(^\text{257}\) The S.U.M.’s charter, which was extremely liberal for that time, nonetheless, provided shareholders with significant powers over management – indeed, it has been said that the S.U.M. was “subject to practically no control beyond that of its stockholders.”\(^\text{258}\)

Early general U.S. corporate law statutes also emphasized the power of shareholders to direct corporate policy and control the actions of the board. Although these statutes vested general management powers in the directors and officers, their powers were constrained by strong shareholder participatory rights.\(^\text{259}\) The courts during this period also recognized the shareholders’ meeting as representing the corporation’s ultimate power center and “critical decision-making forum.”\(^\text{260}\) Any significant corporate changes required unanimous shareholder consent, and shareholders had the right to select directors annually by majority vote and remove them at will.\(^\text{261}\) There were also early attempts to limit management’s ability to use proxies to control the

Pa. 1881), which stated that the law “recognizes the stockholders as the ultimate controlling power in the corporation”); WRIGHT, supra note 209, at 119 (describing U.S. stockholders throughout the antebellum period as “residual decision makers” and “final arbiters of disputes within management”). See also BERLE & MEANS, supra note 15, at 123-24 (noting that shareholders had “a considerable degree of control over the policies of the corporation”, as a result of the fact that no fundamental organizational change could be effected without unanimous shareholder approval.)

\(^{261}\) Seligman, supra note 209, at 258.
shareholders’ meeting.\textsuperscript{262} During this period, U.S. law conceived of the corporation as “democratically controlled, in theory at least.”\textsuperscript{263}

By the late 19\textsuperscript{th} century, however, the wind was blowing in a very different direction with regard to state control of corporations and shareholder rights. U.S. corporate law was in the throes of an irrevocable shift, in the form of the well-documented rise of state competition for incorporation charters\textsuperscript{264} that would reshape it for modern times. Such competition had not been possible in an earlier era, when enterprises had no right to carry on business outside their state of incorporation.\textsuperscript{265} As localism\textsuperscript{266} and state control over corporations receded, however, the community-based aspirations of corporations gave way to private organizational profit-seeking on a grand, and previously unimaginable, scale.\textsuperscript{267}

State competition for corporate charters represented a massive backlash against U.S. corporate law’s restrictive past. New Jersey was an early leader in this race. The General Corporation Act of New Jersey (Revision Act of 1896) (“1896 New Jersey Act”) introduced corporate law revisions,\textsuperscript{268} which conferred what have described as

Earle, 38 U.S. (13 Pet.) 519, at 587-88 (1839), which held that corporations had no constitutional right to carry on business outside the particular state that authorized their existence).

\textsuperscript{266} See generally James W. Moore & Donald T. Weckstein, Corporations and Diversity of Citizenship Jurisdiction: A Supreme Court Fiction Revisited, 77 HARV. L. REV. 1426, 1427-29 (1964).

\textsuperscript{267} Maier, supra note 208, at 81.

\textsuperscript{268} See Pollman, supra note 218, at 649-51. Although many commentators date New Jersey’s early dominance in the market for corporate charters as beginning with the 1896 amendments to its corporation law, Professor Yablon argues that New Jersey’s lead had already begun at least 15 years earlier, but was extended in 1888-89, when New Jersey passed legislation permitting a corporation to hold shares in another corporation. See Yablon, supra note 264, at 326-27. This view accords with the opinion of one contemporary commentator, who described legislative reforms to corporations law under New Jersey law from 1875 onwards as reflecting a “consistent, definite, and progressive policy” regarding the organization and regulation of corporations. See Keasbey, supra note 257, at 209. New Jersey amended its corporate law repeatedly throughout the 1890s, with changes in 1893, 1896, 1897 and 1898. Yablon, supra note 264, at 349.
“breathtaking privileges”\textsuperscript{269} on corporations and were far more permissive than comparable legislation in other states at the time. The Act affected, not only powers of the corporation itself, but also the balance of power within the corporation. Specifically, it enhanced the role of directors and diminished that of shareholders. It has been claimed that the 1896 New Jersey Act represented the beginnings of a new “absolutism”, under which the powers of the board came to be regarded as identical to those of the corporation itself.\textsuperscript{270}

Yet, some remnants of the shareholder control remained, although these would diminish over time. In relation to bylaw amendment, for example, a new provision of the 1896 New Jersey Act, section 11, authorized any corporation in its certificate of incorporation to confer power to alter the bylaws on the directors. Under section 11, however, plenary power to alter the bylaws was accorded to the stockholders, who were also given express power to alter or repeal bylaws made by the directors.

New Jersey’s early dominance was cemented by another set of reforms in the 1880s, which permitted corporations to act as holding companies for the first time.\textsuperscript{271} These reforms legitimized economic concentration and facilitated the first great wave of mergers in American history.\textsuperscript{272} New Jersey became a major beneficiary when, unlike

ECON. 68 (1935) for the proposition that by the early 20\textsuperscript{th} century, 328 business combinations, effected between 1888 and 1905, controlled approximately 40\% of all manufacturing capital in America). \textit{See also} Alfred Chandler, \textit{The Beginning of ’Big Business’ in
many other states, it adopted a policy of “encouraging rather than discouraging the aggregation of capital.”  

It has been estimated that, by 1900, 95% of major U.S. companies were incorporated in New Jersey.  

The chartering business proved so rewarding for New Jersey that, by 1902, fees associated with it were sufficient to pay off the entire state debt.

It was hardly surprising that other states jumped on the lucrative corporate chartering bandwagon. Soon, states such as New York, West Virginia, Maine, Maryland and Kentucky, as well as Delaware, were trying to emulate New Jersey’s winning formula. As the race for state charters gained momentum, a major selling point was the promise by each state that it could provide more liberal incorporation laws than its competitors, in terms of expanded corporate powers and shareholder immunity.

New Jersey’s early success was, however, short-lived. In 1913, the state handicapped itself in the race for corporate charters by adopting the restrictive “Seven Sisters Acts”, which were designed to control monopolies by reinstating restrictions on trusts and holding companies. Although New Jersey repealed most of these Acts in 1917, the damage was done. The state never regained its ascendancy over corporate charters; Delaware took its place. Even though, for the most part, Delaware’s 1899

279 See Seligman, supra note 209, at 270.

280 Id. According to Professor Yablón, however, the 1899 Delaware Act contained a “few improvements from a promoter’s standpoint.” Yablón, supra note 264, at 359. Perhaps the most
General Corporation Law ("1899 Delaware Act") merely replicated the New Jersey legislation,\(^{281}\) by 1915 the Delaware Act had acquired cachet as quintessentially modern and “liberal.”\(^{282}\) Major corporations, such as DuPont and General Motors reincorporated in Delaware in 1916,\(^{283}\) and the rest is history.\(^{284}\)

The powerful image of Delaware corporate law as “enabling”, rather than mandatory, dates from this period, and explains modern resistance to federal laws, such as the Dodd-Frank Act, which include mandatory provisions that impinge on corporate law.\(^{285}\) The “enabling law” label signifies U.S. corporate law’s path-dependence, reflecting the fact that from the late 19\(^{th}\) century onwards, U.S. state laws began to permit what had previously been forbidden under the strict rules associated with chartered corporations.

This shift towards greater legislative flexibility in the race for corporate charters had a significant effect on shareholder participation rights in U.S. public corporations. Although there was a strong emphasis on shareholder protection in early 20\(^{th}\) century Delaware case law, which frequently referred to directors as trustees for the stockholders,\(^{286}\) Delaware’s “revolutionary general corporation law”\(^{287}\) laid the groundwork for diminishing participation rights for shareholders.

\(^{281}\) Yablon, supra note 264, at 327.

\(^{282}\) Id.; Cary, supra note 51, at 664-65.

\(^{283}\) See Yablon, supra note 264, at 325, n. 10.

\(^{284}\) Delaware is still the dominant state in corporate law today. Approximately 60% of the largest U.S. public corporations are incorporated in Delaware, as well as 80% of reincorporations. See Skeel, supra note 74, at 2.

\(^{285}\) The idea that corporate law was “enabling” was an important feature of the nexus of contracts theory of the corporation. See 89 COLUM. L. REV. 1395 (1989) (discussing in detail the mandatory/enabling debate in U.S. corporate law). See also Pollman, supra note 218, at 651; Thompson, supra note 218, at 7 (discussing the interplay between mandatory and permissive rules under U.S. corporate law and noting the fact that after the shift to permissive state laws, U.S. federal law assumed the “mantle of regulation”). For a recent discussion of the link between the largely enabling structure of US corporate law and private ordering, see Barzuza, supra note 103.

\(^{286}\) See S. Samuel Arsht, A History of Delaware Corporation Law, 1 DEL. J. CORP. L. 1, 9 (1976).

\(^{287}\) Id.; Seligman, supra note 209, at 271 ff. (discussing the 1899 Delaware Act).
Like the 1896 New Jersey Act, on which it was based, the 1899 Delaware Act provided greater flexibility in the contents of the corporate charter and bylaws. Under the 1899 Delaware Act and important amendments in 1901, Delaware delegated its right to determine the intra-corporate structure and distribution of power to the incorporators themselves. This “self-determination provision” essentially flipped U.S. corporate law history on its head, designating the corporation, rather than the state, as primary “law-maker.” However, because the Act, as originally passed, vested power to manage the business of the corporation in the board of directors, this new-found flexibility, in fact, advantaged management and the board, rather than the shareholders. The move to liberal statutes, which Delaware’s new legislation exemplified, introduced default rules that shifted the balance of corporate governance power in favor of the board of directors. According to one commentator, it was during the 1920s that promoters and managers of Delaware corporations used the self-determination provision to launch an assault on “the last vestiges of shareholder control.” These developments in U.S. corporate law history laid the groundwork for many contentious examples of private ordering combat today.

291 Seligman, supra note 209, at 273 (noting that this “self-determination” provision was the diametric opposite of the legal position during the first 100 years of U.S. company law history, which was based on the rule that the only powers of the business corporation were those expressly or impliedly provided in its charter with the State).

294 Harris & Lamoreaux, supra note 28, at 28.

Whereas the original backdrop for U.S. corporate law was one of strict state control and mandatory laws, the opposite was true for U.K. company law as a result of its different organizational starting point.

From the mid-19th century onwards, U.K. company law developed from a baseline of remarkable flexibility regarding allocation of power and participation rights for shareholders. Unlike in the United States, the board’s powers were derived, not from statute, but from the company’s own constitution (“articles of association” or “articles”). These board powers could be “as broad or as narrow…as desired.” Significantly, decisions as to the breadth or narrowness of the board’s powers were matters for the shareholders, who could alter the contents of the articles of association by special resolution, requiring a 75% majority. Although some 19th century U.K. company cases interpreted shareholders’ power in this regard to mean that directors were merely agents of shareholders, this paradigm was overturned in 1906 in Cuninghame’s case. This watershed decision made it clear that the articles created separate and autonomous spheres of authority for both directors and shareholders.

---

296 Although the 1844 Joint Stock Companies Act, 7 & 8 VICT., c. 110 and the 1856 Joint Stock Companies Act, 19 & 20 VICT., c. 47 use the term “shareholder”, the 1862 Companies Act, 25 & 26 VICT., c. 89 and subsequent U.K. legislation, including the current Companies Act 2006, c. 46, use the term “member.”

297 Cf. Susan Watson, The Significance of the Source of the Powers of Boards of Directors in U.K. Company Law, 6 J. BUS. L. 597 (2011) (questioning the significance of the fact that directors in the U.K. obtained their powers from the articles of association, rather than statute, given that the articles invariably vested managerial power in the board). For the historical importance of statutory law in defining the basic structure of U.S. corporate law, however, see Strine & Walter, supra note 217, at 903-4. For discussion of the transition that occurred under U.S. corporate law towards a director-centred corporate model, see Horwitz, supra note 221, at 214-16.

298 ROBERT R. PENNINGTON, COMPANY LAW 572 (6th ed., 1990). This was not always the case under U.K. companies legislation. The original 1844 Joint Stock Companies Act required a company to have directors (§ 7), vested management power in those directors (§ 27(1)), and stated that shareholders could not act “in the ordinary Management of the Concerns of the Company otherwise than by means of Directors” (§ 27). Nonetheless, even under the 1844 Joint Stock Companies Act, the shareholders had significant powers in, for example, their ability to make bylaws (§ 25(11)), to which the directors were subject (§§ 25(11); 27(1)). From 1856 on, however, the allocation of power in U.K. companies was a matter for the model articles. See 1856 Joint Stock Companies Act, 19 & 20 VICT., c. 47, Table B, Art. 46.

299 See e.g., 1862 Companies Act, 25 & 26 VICT., c. 89, § 50.

300 Isle of Wight Rly v. Tahourdin (1883) Ch. D. 320.

301 Automatic Self-Cleansing Filter Syndicate Co. Ltd v. Cuninghame [1906] 2 Ch 34.

Under the division of powers doctrine elucidated in Cuninghame’s case, where the articles vested managerial power in the board, the board would be immune from interference by shareholders in its decision-making. 303 However, it was the shareholders, due to their unilateral control over the contents of the articles of association, that had power to determine this allocation of power. It was therefore possible for shareholders to give directions and advice to the board of directors of U.K. companies, if this power were specifically allocated to shareholders by the articles, which was commonly the case.

The ability of shareholders to alter the articles of association was a mandatory feature of U.K. company law,304 conferred by statute.305 Any provision attempting to contract out of, or deprive shareholders of, this inherent power would be invalid, as contrary to statute.306 In contrast to modern Delaware law regarding amendments to the corporate charter,307 U.K. shareholders could also initiate such constitutional changes without the need for board approval.

The articles of association therefore represented a contractual bargain between shareholders about how their company should be governed. This bargain, which explicitly bound the shareholders and the company (though not the directors), was given statutory recognition.308 It has been suggested that this inherent power of the

303 For a recent Australian example of the scope and operation of the division of powers doctrine, see Australasian Centre for Corporate Responsibility (ACCR) v. Commonwealth Bank of Australia (CBA) [2016] FCAFC 80.

305 See e.g., 1862 Companies Act, 25 & 26 Vict., c. 89, §§ 50-51.

306 See Allen v. Gold Reefs of West Africa Ltd. [1900] 1 Ch. 656, 671; Peters’ American Delicacy Co. Ltd. v. Heath (1939) 61 CLR 457, 479. In limited circumstances, however, a company’s articles may contain a “provision of entrenchment” requiring more restrictive conditions to be met, or procedures complied with, in order to alter the articles. See Companies Act, 2006, c. 46, § 22 (U.K).

307 DEL. CODE ANN. tit. 8 § 242(b).

308 Gower, supra note 198, at 1376. Individual shareholders could enforce their membership rights under the contractual bargain represented by the articles of association, thereby avoiding the restrictive standing requirements of the famous Rule in Foss v. Harbottle. See 1862 Companies Act, 25 & 26 Vict., c 89, § 16; Companies Act 2006, c. 46, § 33(1) (U.K). Cf. Corporations Act 2001 (Cth), § 140(1)(b) (Austl.) (providing that a company’s constitution embodies a contract between directors and company, though not between directors and members).
shareholders to alter the articles according to their own wishes is the cornerstone of shareholder rights in the United Kingdom.\textsuperscript{309}

Although the United Kingdom had company law Acts from 1844 onwards, such statutes initially offered minimal statutory protection for outside investors, and reflected a strongly \textit{laissez-faire} paradigm.\textsuperscript{310} Unlike the liberalization of U.S. corporate law statutes from the late 19\textsuperscript{th} century onwards, which strengthened the role of directors, shareholders were pivotal under the U.K. version of company law – it was assumed that these shareholders could write their own bargain via the articles of association. Indeed, this “free contracting” aspect of the articles meant that, at the turn of the 20\textsuperscript{th} century, U.K. corporate governance was not dissimilar to some jurisdictions, such as Norway, which had no statutory corporate law whatsoever.\textsuperscript{311}

U.K. companies were not required to devise their own constitutions/articles of association from scratch. They could rely instead on model articles,\textsuperscript{312} which were

\textsuperscript{310} See CHEFFINS, \textit{supra} note 28, at 35, 194, 273. This \textit{laissez-faire} approach did not, however, come into full bloom until 1856. The first Joint Stock Companies Act, 1844 in fact constituted a regulatory response to concerns about fraudulent company promotions in the early 19\textsuperscript{th} century. One of its goals being “to regulate, not to encourage, speculation”, the 1844 Act, therefore, included some specific shareholder protection provisions, particularly relating to publicity and disclosure. See Gower, \textit{supra} note 203, at 536; Ireland, \textit{supra} note 203, at 241-42; Harris & Lamoreaux, \textit{supra} note 28, at 7 (describing 1844 as a “highpoint in terms of disclosure.”) These shareholder safeguards were, however, effectively abolished by the 1856 Joint Stock Companies Act, 19 & 20 Vict., c. 47, which included limited liability, but negligible disclosure requirements. See Harris & Lamoreaux, \textit{supra} note 28, at 7-8. The 1856 legislation was quintessentially permissive, and definitively charted a \textit{laissez-faire} course for U.K. company law. See McQueen, \textit{supra} note 203, at 185-87, 192-95; Gower, \textit{supra} note 203, at 536-37; Ireland, \textit{supra} note 203, at 242; \textit{Hansard}, 3\textsuperscript{rd} series, vol. 140, 1/2/1856, col. 129, http://hansard.millbanksystems.com/commons/1856/feb/01/law-of-partnership-and-joint-stock#column_129.

\textsuperscript{311} Mike Burkart et al., \textit{Why Do Boards Exist? Governance Design in the Absence of Corporate Law} (Jan. 23, 2017), https://papers.ssrn.com/sol3/papers2.cfm?abstract_id=2902617. See also Harris & Lamoreaux, \textit{supra} note 28 (contrasting the high level of contractual freedom in small and medium size enterprises (SMEs) under British company law during the 19\textsuperscript{th} century with the far more restrictive approach under U.S. corporate law). See also Guinnane et al., \textit{supra} note 226, at 5 (describing the legal regime that operated in the second half of the 19\textsuperscript{th} century in the United Kingdom as “arguably the most liberal general incorporation law in the world”).

\textsuperscript{312} See generally Companies House, \textit{Model Articles of Association for Limited Companies}, GOV. UK, Mar. 3, 2015. The earliest model articles of association for U.K. registered companies were found in the 1856 Joint Stock Companies Act, 19 & 20 Vict., c. 47, Table B. The model articles were renamed “Table A” in the 1862 Companies Act, 25 & 26 Vict. c. 89, and this terminology continued up to and including the Companies Act 1985, c. 6. Under the Companies Act 2006, c. 46, §19 (U.K.), the U.K. Secretary of State has power to prescribe, by regulations, “model articles of association”, which a company may adopt.
attached to the companies legislation and subject to amendment by the Board of Trade. These model articles represented a set of default rules that companies could adopt in whole, in part, or not at all.

It is interesting to note that, from the mid-19th century onwards, the model articles in the United Kingdom contained robust participatory rights for shareholders. The model articles in the 1856 Joint Stock Companies Act, for example, included provisions to the following effect:- any number of shareholders with an aggregate of not less than 20% of shares could requisition the directors to convene an extraordinary general meeting; any shareholder could submit resolutions by giving at least 3 days prior notice; and shareholders could at any time remove a director from office by special resolution and appoint a replacement. Form C of the 1856 Joint Stock Companies Act contained a provision, which enabled any two shareholders to summon an extraordinary general meeting at any time.

Similar shareholder participatory rights were found in the model articles of the 1862 Companies Act, which many regard as the first truly modern U.K. company law. These “Table A 1862” articles vested managerial power in the board of directors, though subject to any powers that the Act or articles conferred on the shareholders in the general meeting. Specific powers granted to shareholders by these articles included the ability to schedule “ordinary” or annual general meetings and the ability of 20% of members to requisition directors to convene an extraordinary general meeting. Where the directors failed to comply with this requisition within

21 days, the same number of shareholders could convene an extraordinary general meeting themselves.\textsuperscript{323} The 1862 Act provided a default rule permitting five members to summon meetings, in the absence of any articles dealing with the issue.\textsuperscript{324} Several provisions of Table A 1862 limited directors’ discretion by making their power to act conditional on shareholder approval. Shareholder consent was a necessary precondition to board action to increase capital\textsuperscript{325} or declare a dividend.\textsuperscript{326}

Table A 1862 provided for staggered board terms.\textsuperscript{327} Staggered boards have acquired a poor reputation in modern U.S. corporate governance literature due to their alleged ability to insulate directors,\textsuperscript{328} because shareholders can only remove directors of staggered boards “for cause” under Delaware law.\textsuperscript{329} However, the staggered term in Table A 1862 would not operate in the same way, since shareholders could, under Article 65, remove any director from office by special resolution.\textsuperscript{330} Later iterations of Table A articles would provide shareholders with even stronger rights, by granting them an explicit power to remove the managing director from office.\textsuperscript{331}

The 1862 Companies Act sent mixed messages with regard to shareholder voting.\textsuperscript{332} The Act itself established a per capita voting blueprint – it provided that, absent a specific provision in the articles, “every Member shall have One Vote.”\textsuperscript{333} However, a

\textsuperscript{329} Under Delaware corporate law, shareholders can only remove directors of staggered boards “for cause.” See DEL. CODE ANN. tit. 8 § 141(k)(1).

\textsuperscript{330} Today, this is a statutory right, under both U.K. and Australian corporate law that cannot be altered in the constitution or by agreement. See Companies Act, 2006 c. 46 § 168(1) (U.K.); Corporations Act 2001 (Cth), § 203D(1) (Austl.).

\textsuperscript{331} See e.g., Companies (Consolidation) Act 1908, 8 Edw. 7, c. 69, Art. 72.

\textsuperscript{332} See also Hansmann & Pargendler, supra note 223 (analyzing in detail early voting rights in the United States).

\textsuperscript{333} 1862 Companies Act, 25 & 26 VICT. c. 89, § 52.
different voting regime applied under the model articles. Article 44 of Table A 1862 adopted a graduated voting model.\textsuperscript{334} The Companies (Consolidation) Act 1908 brought more consistency to shareholder voting, by establishing a one share/one vote default rule for a poll under both the Act\textsuperscript{335} and the model articles.\textsuperscript{336}

Of course, these U.K. model articles were default rules only. A fundamental question therefore arises – did U.K. public companies actually adopt them, thereby including strong shareholder participation rights in their own constitutions? There is mixed, and at times conflicting, recent scholarship on this issue. One study, by Professors Foreman-Peck and Hannah, suggests that in the early 20\textsuperscript{th} century, many registered companies quoted on the London Stock Exchange voluntarily adopted robust shareholder rights in their articles as a means of signaling propriety to would-be investors.\textsuperscript{337} This story has strong parallels with the current developments in the United States concerning private ordering of corporate governance.

Another study, by Professor Guinnane, Harris and Lamoreaux, suggests, to the contrary, that the contractual freedom given to U.K. shareholders under the articles of association in early company law was appropriated over time by the directors, who

\textsuperscript{334} \textit{Id.}, Table A, Art. 44 (adopting a tiered voting model, which conferred one vote per share for the first ten shares held; with one vote for every five shares thereafter up to 100 shares; and beyond that, one vote for every ten shares). See also Hansmann & Pargendler, \textit{supra} note 223, at 951-52 (describing the use of “graduated voting” in the United States.)

\textsuperscript{335} See Companies (Consolidation) Act 1908, 8 Edw. 7, c. 69, § 67(iv).

\textsuperscript{336} \textit{Id.}, Table A, Art. 60. See also James Foreman-Peck & Leslie Hannah, \textit{U.K. Corporate Law and Corporate Governance before 1914: A Re-Interpretation in Complexity and Crisis in the Financial System: Critical Perspectives on the Evolution of American and British Banking} 183, at 196 (Matthew Hollow, Folarin Akinbami & Ranald Michie, eds., 2016) (stating that after 1900, it was unusual for large registered quoted companies to adopt anything other than the one share/one vote principle.)

\textsuperscript{337} \textit{Id.} at 184. Professor Foreman-Peck and Hannah also highlight the fact that analogous investor protections were mandatory under the 1845 Company Clauses Consolidation Act, which applied to statutory companies, authorized by private Parliamentary Acts. Statutory companies falling within the aegis of this Act included public utilities, such as railway and canal companies. \textit{Id.} at 186-88, 191-92; 1845 Company Clauses Consolidation Act, 8 Vict., c. XVI. Foreman-Peck and Hannah note that, until the end of the 19\textsuperscript{th} century, these statutory companies were the dominant form of company quoted on U.K. stock exchanges, but were later eclipsed by registered companies. \textit{Id.} at 187, 197. This study provides a striking contrast with the widely-held view that U.K. shareholders were largely unprotected at the beginning of the 20\textsuperscript{th} century. See e.g. Julian Franks, Colin Mayer & Stefano Rossi, \textit{Ownership: Evolution and Regulation}, 22 REV. FIN. STUD. 4009, at 4010 (2009).
then used it to dilute shareholder rights and shift the balance of power in their own favor.338

Unlike the current U.S. phenomenon of private ordering combat, the study by Guinnane et al. is essentially a story of private ordering capture.339 Private ordering capture was certainly possible in the United Kingdom during the early decades of the 20th century. Shareholder resolutions were usually determined by proxy voting prior to the actual shareholders’ meeting and the directors had strategic superiority in this process.340 As Maugham J, stated in the 1934 case, Re Dorman Long & Co Ltd, “[i]n a sense, in all these cases, the dice are loaded in favour of the views of the directors.”341

It is difficult to assess these competing claims because the studies are based on different sample groups of U.K. companies. Nonetheless, both studies provide interesting and revealing insights. Even the study by Guinnane et al. suggests that, at least for some rights, a high proportion of companies adopted Table A articles. This study finds, for example, that a large majority (76.2%) of companies in its 1892 sample followed the Table A article granting shareholders power to remove directors by special resolution. Also, most companies in the sample permitted shareholders to convene general meetings fairly easily.342

Further incentives to comply with the model articles were created by revisions to 1908 U.K. Companies Act Table A articles, which created a link between the model articles and the model

338 Guinnane et al., supra note 226.

339 Id. at 3-4. See also CHEFFINS, supra note 28, at 195. Professor Cheffins cites an 1899 complaint, which supports the existence of private ordering capture during this period (“[T]he shareholder is absolutely defenceless. Provided you do not commit downright larceny or embezzlement you can do anything under suitable Articles of Association”).

340 See In re Dorman Long & Co. Ltd; In re South Durham Steel & Iron Co. Ltd [1934] Ch. 635.

341 Id. at 657-58. See also CHEFFINS, supra note 28, at 40 (citing a 1935 article by Cole which states “[I]n the ceaseless buying and selling of stocks and shares, and above all in the flotation and disposal of new capital issues, the insiders are obviously at an enormous advantage over the general investing public.” G.D.H. Cole, The Evolution of Joint Stock Enterprise in STUDIES IN CAPITAL & INVESTMENT 51, 64 (G.D.H Cole ed., 1935.))

342 Most of the sample companies adopted Article 32 of Table A (or an approximation of it), requiring directors to call such a meeting if requested by at least one-fifth of the members. See Guinnane et al., supra note 226, at 21. In addition, 12 out of 54 sample companies had no articles of association on file, which suggests wholesale adoption of the model articles. Guinnane et al. consider that this is the most likely explanation, but acknowledging that it is possible that the missing articles could simply have been lost. Id. at 14, 28, 50.
articles and London Stock Exchange Listing Rules. It has been suggested that the burgeoning influence of the London Stock Exchange, which required companies seeking quotation to have articles of association of which the Committee of the Stock Exchange approved, provided indirect incentives for companies to adopt Table A-style good corporate governance practices. The model articles therefore arguably served as an important benchmark against which individual companies’ articles could be assessed and evaluated. Table A effectively operated as a norm creator.

However, it is also likely that there is at least some truth in Guinnane et al.’s allegation of private ordering capture during this period of U.K. company law. The authors cite an 1894 investment guide, which warned potential investors to review a company’s articles of association carefully in advance to ensure that they did not deprive the shareholders of “their just rights” by “unrestrictedly vesting in the directors all the powers of the company.” What is noteworthy about this investor warning is that it treated dilution of shareholder rights, not as an appropriate allocation of power, but rather as a perversion of good governance.

Furthermore, because Guinnane et al.’s study is primarily an examination of the articles of association, it pays less attention to the broader U.K. company law context, in which there were important developments relating to the interplay of voluntary and mandatory rules. From the early 20th century onwards, there was a shift towards juridification in U.K. company law. This involved a series of reforms, which introduced mandatory statutory rules that either prohibited certain practices or guaranteed shareholders specific participation rights. These mandatory rules were often introduced in response to market crises, and on the recommendation of influential U.K. reform committees, which provided regular status reports on U.K.

---

343 See CHEFFINS, supra note 28, at 40 (stating that U.K. stock exchange listing rules were often more protective than company law.) See also id. at 196-97 (noting, however, that the level of protection prior to 1914 was “generally meagre”).

344 See e.g. Foreman-Peck & Hannah, supra note 336, at 185, 193-94; CHEFFINS, supra note 28, at 197. Cf. however, Guinnane et al., supra note 226, at 4, 25-29.

345 Guinnane et al., supra note 226, at 33.

347 See CHEFFINS, supra note 28, at 275-78.
company law throughout the 20th century. Many of the reforms adopted in response to the Greene Committee Report in 1926, the Cohen Committee Report in 1945, the Jenkins Committee Report in 1962 were mandatory rules designed to give shareholders a greater degree of control over the board of directors.

These mandatory statutory rules operated against the traditional ‘free contracting’ backdrop of U.K. company law. The statutory provisions both complemented and trumped the articles of association. The 1900 U.K. Companies Act, for example, introduced a mandatory statutory rule granting shareholders with 10% or more of the company’s issued capital the right to convene a general meeting. This suggests that a significant number of companies failed to include analogous Table A rights in their articles of association, thereby prompting the legislature to intervene and introduce them as mandatory rules. These legislative gap fillers provided one-way flexibility – the articles of association could increase, but not decrease, the shareholder protection and participatory rights provided by the statutory rules.

Another clear example of the impact of the divergent origins of U.K. and U.S. corporate law relates to exculpation clauses. Express legislative authorization was required before U.S. corporate charters could include exculpatory clauses protecting directors from claims of breach of the duty of care, including gross negligence. That

348 See id. at 328-31.
352 See Companies Act 63 & 64 VICT. c 48 (1900) § 13, Table A, Art. 48 (U.K.).
353 Nolan, supra note 35, at 103.
354 E.g., under the 1947 Companies Act, rules regarding the length of notice for general meetings, which were previously default rules only, became mandatory minimum rules, which could be increased, but not decreased in the company’s articles. See 10 & 11 Geo. c 47 (1947) § 2 (U.K.). See generally Nolan, supra note 35, at 103-5. The 1947 Companies Act also, for the first time, granted shareholders an inalienable statutory right to remove directors from office. See 10 & 11 Geo. c 47 (1947) § 29 (U.K.).
355 Conaglen & Hill, supra note 62.
“enabling” legislation appeared only in 1986, when Delaware enacted DGCL section 102(b)(7) as a rapid regulatory response to *Smith v Van Gorkom.*

In the United Kingdom, on the other hand, exculpation (or exoneration) clauses were common in the articles of public companies from the early 20th century on as a result of the “free contracting” background. Their widespread use accords with a private ordering capture hypothesis. However, contrary to the approach of many U.S. states in explicitly authorizing such clauses, the United Kingdom introduced reforms in 1928 that prohibited and invalidated any provision exempting directors from liability for breach of duty, including negligence. These reforms were based on the recommendations of the Greene Committee, which was scathing in its assessment of this type of article, stating that, in its view, it gave directors “a quite unjustifiable protection.”

9. Conclusion

This article explores a range of contemporary U.S. corporate governance developments, including shareholder empowerment and private ordering combat. It seeks to understand certain legal and attitudinal differences relating to shareholder participation in corporate governance between the United States and other common law jurisdictions, such as the United Kingdom.

The article examines these issues from comparative and historical perspectives. It highlights the fact that U.S. and U.K. corporate law have different organizational origins and, as a result of these dissimilar starting points, combined with origins backlash, have followed quite different paths from the late 19th century onwards. U.S.

---

358 This reform was based on recommendation of the U.K. Greene Committee. See Board of Trade, *supra* note 349, at §§ 46-47.

359 Id. § 46 (The Greene Committee continued by saying that under this type of article, “a director may with impunity be guilty of the grossest negligence provided that he does not consciously do anything which he recognises to be improper.”) See generally Conaglen & Hill, *supra* note 62.
law shifted from a rigid corporate law system, which evolved from chartered corporations, to a far more liberal and flexible system, but a system in which directors and corporate managers held the reins of corporate power and where the participatory role of shareholders in U.S. corporate governance was diminished. The United Kingdom, on the other hand, shifted from a “free contracting” position, which evolved from unincorporated deed of settlement companies, to a system where shareholders received stronger rights as a result of mandatory participatory rights and various statutory protections.

The distinctive trajectory of U.S. corporate governance goes some way to explaining why activism first developed in the United States, why it continues to be such a controversial issue today, and why institutional investors are increasingly using private ordering remedies to acquire governance rights that are already available to shareholders in other common law jurisdictions. These U.S. developments also reflect the increasing globalization of capital markets and corporate governance.
